

Twenty-Sixth Biennial Report
OF THE
Department of Agriculture

State of Florida

From July 1, 1938, to June 30, 1940

NATHAN MAYO
COMMISSIONER OF AGRICULTURE
Tallahassee, Fla.

LETTER OF TRANSMITTAL

DEPARTMENT OF AGRICULTURE
STATE OF FLORIDA
OFFICE OF THE COMMISSIONER

*To His Excellency,
Hon. Fred P. Cone,
Governor of Florida.*

SIR: I herewith submit to you the Twenty-Sixth Biennial Report of the Department of Agriculture for the Fiscal Year—July 1, 1938, to June 30, 1940.

NATHAN MAYO,
Commissioner of Agriculture.

TABLE OF CONTENTS

	Page
Personnel	7
Some Facts About Florida	14
PART I—BRIEF NARRATIVE REPORTS FROM BUREAUS AND DIVISIONS	
Bureau of Immigration	28
Division of State Markets	30
State Marketing Bureau	40
Inspection Bureau	43
Milk Inspection Division	50
List of Florida Dairymen	60
Dairymen Operating Farm Pasteurizing Plants	82
City Milk Pasteurizing Plants	91
List of Florida Frozen Dessert Manufacturers	93
List of Goat Dairies in Florida	102
PART II—DETAIL OF FINANCIAL OPERATIONS	
Period July 1, 1938 to June 30, 1939	103
Period July 1, 1939 to June 30, 1940	121
PART III—DETAIL OF LABORATORY AND INSPECTION SERVICE	
Feed and Cottonseed Meal	140
Feed Manufacturers Operating in Florida	141
Dog Food Manufacturers Operating in Florida	153
Fertilizer Inspection	156
Fertilizer Manufacturers Operating in Florida	157
Tabulation of Fertilizer Sales:	
By Counties Fiscal Year 1938-1939	164
By Counties Fiscal Year 1939-1940	167
Seed Testing, Labeling and Certification	171
Insecticide and Fungicide Division	173
Gasoline and Kerosene Inspection	175
Tabulation of Sales:	
July 1, 1938 to June 30, 1939	177
Consumption by Counties	184
Gasoline and Kerosene Sales 1938-1939 to Federal Agencies	186
July 1, 1939 to June 30, 1940	187
Consumption by Counties	194
Gasoline and Kerosene Sales 1939-1940 to Federal Agencies	196
Tabulation of Analyses:	
July 1, 1938 to June 30, 1939	197
Oil Laboratory Analysis	198
Active Filling Stations	199
Pumps Tested for Accuracy	200
Gasoline Analyses by Manufacturers	202
Gasoline Analyses by Counties	203
Kerosene Analyses by Manufacturers	205
Kerosene Analyses by Counties	206
July 1, 1939 to June 30, 1940	
Oil Laboratory Analyses	207
Active Filling Stations	208
Pumps Tested for Accuracy	209
Gasoline Analyses by Manufacturers	212
Gasoline Analyses by Counties	213
Kerosene Analyses by Manufacturers	215
Kerosene Analyses by Counties	216

PERSONNEL OF THE DEPARTMENT OF
AGRICULTURE

NATHAN MAYO, *Commissioner*

MRS. E. E. SELMAN, *Secretary to the Commissioner*

SINCLAIR WELLS, *Administrative Assistant*

T. J. BROOKS, *Assistant Commissioner*

WM. C. PIERCE, *Attorney*

BUREAU OF IMMIGRATION

G. W. BRITT, *Chief Clerk Mailing Division*

MRS. VERA LEVERETTE, *Stenographer*

ALMA SCHOELLES, *Stenographer*

ROBT. E. GLASS, *Clerk*

JOHN LEVERETTE, *Clerk*

RAY W. ROBIE, *Manager Fair Exhibits*

SHIRLEY POPE, *Manager Fair Exhibits*

AUDITING DIVISION

G. C. THARPE, *Auditor*

LEE THOMPSON, *Assistant Auditor*

M. C. HARTSFIELD, *Clerk*

H. N. MOORE, *Clerk*

MRS. JNO. B. O'NEILL, *Stenographer*

H. R. FERRAN, *Field Auditor*

CHEMISTRY DIVISION

J. J. TAYLOR, *State Chemist*

MISS MURIEL ROSE, *Secretary to State Chemist*

MISS LOUISE COVINGTON, *Stenographer-Clerk*

MRS. LEOLA S. CROY, *Stenographer*

GORDON HART, *Fertilizer Chemist*

J. K. LAWTON, *Fertilizer Chemist*

R. M. SMITH, *Fertilizer Chemist*

DAN LONG, *Fertilizer Chemist*

W. Y. GARY, *Fertilizer Chemist*

E. B. LOYLESS, JR., *Fertilizer Chemist*

E. PECK GREENE, *Feed Chemist*

HAROLD HOFFMAN, *Feed Chemist*
B. JAY OWEN, *Chemist-Inspector*
VINCENT E. STEWART, *Drug Chemist*
E. M. HODNETT, *Food Chemist*
W. S. GARFIELD, *Bakery Inspector*
CHAS. E. FREEMAN, *Drug Inspector*

LAND DIVISION

F. E. BAYLESS, *Chief Clerk*
H. L. SHEARER, *Clerk*
MISS HELEN PARKS, *Stenographer*
MISS DAISY FERRELL, *Clerk*

FIELD NOTE DIVISION

MISS BESSIE DAMON, *Chief Clerk*
PAUL BALDWIN, *Clerk*

PRISON DIVISION

S. L. WALTERS, *Chief Clerk*
WALTER ROBERTS, *Identification Expert*
JOHN WILLIAMS, *Clerk*
HARRY MORRISON, *Clerk*
MRS. EDNA LEE TINNEY, *Stenographer*

STATE MARKETING BUREAU

L. M. RHODES, *Commissioner*
NEILL RHODES, *Assistant Commissioner*
S. W. HIATT, *Marketing Specialist, Fruits & Vegetables*
L. H. LEWIS, *Marketing Specialist, Live Stock & Field Crops*
F. W. RISHER, *Marketing Specialist, Poultry & Eggs*
F. H. SCRUGGS, *Market News Specialist*
W. L. JACKSON, *Mechanical Foreman*
JAMES MCKELVEY, *Mechanical Operator*
FRED WITT, *Mechanical Operator*
JON B. CORDERO, *Telegrapher*
M. S. KNIGHT, *Clerk*
EFFIE L. CURETON, *Stenographer*

EDNA G. FERGUSON, *Stenographer*
KATHRYN L. VERNON, *Stenographer*
SARA WRIGHT, *Stenographer*

AGRICULTURAL MARKETING BOARD MEMBERS

FRED P. CONE, *Governor*
NATHAN MAYO, *Commissioner of Agriculture*
L. M. RHODES, *State Marketing Commissioner*

AGRICULTURAL MARKETING BOARD EMPLOYEES

WILLIAM L. WILSON, *Director of Markets*
JULIA MAY SAMPLEY, *Secretary to Director*
H. L. LONG, *Construction Supervisor*
J. G. MICHAEL, *Market Comptroller*
JOHN D. SHELTON, *Auditor*
R. I. ROE, *Bookkeeper*
CHARLES KORBLEY, *Market Investigator*
L. A. SAMPLEY, *Construction Foreman*
M. G. WILLIAMS, *Creamery Promotion Specialist*
G. C. HODGE, *Field Investigator*

CITRUS COMMISSION

COMMISSION MEMBERS
L. L. CHANDLER, *Chairman*
THOS. B. SWANN, *Vice Chairman*
E. S. CLARK
J. M. CRILEY
T. C. HAWTHORNE
JOHN M. KNIGHT
E. T. LYLE
E. G. TODD
H. D. ULMER
E. H. WILLIAMS
- HARVEY L. HENDERSON

OFFICE PERSONNEL

JOHN BULL, *Attorney*
CHAS. F. CHASTAIN, *Secretary*
ROBT. STUART, *Chief Clerk*
CECELIA ELLSWORTH, *Stenographer*
ANNIE G. HULL, *Stenographer*
MARY E. NEELY, *Stenographer*

FIELD WORKERS

W. W. HUBBELL, *Chief Field Agent*
W. H. GRIMES
A. M. HENRY
T. C. PERRY
C. D. SHERMAN

SEA ISLAND COTTON CONTROL

JIMMIE RUTH WHITE, *Secretary*
FRANCES BURNEY, *Stenographer*
H. A. CARROLL, *Bookkeeper*
P. W. CALHOUN, *Field Representative*
G. L. DOVE, *Field Representative*
W. F. LOVE, *Field Representative*
P. A. METHVIN, *Field Representative*
HARRY TOMLINSON, *Field Representative*

INSPECTION BUREAU

PHIL S. TAYLOR, *Supervising Inspector*
NAT MAYO, *Chief Field Inspector*
MRS. BESSIE GIBBS PORTER, *Secretary*
MISS PAULINE MCCONNELL, *Stenographer*
MRS. EDITH WEIR, *Registration Clerk*
MISS KIZALU SIMMONS, *Stenographer*
MISS LORENE TOMPKINS, *Clerk*
MISS ROSE E. DEEB, *Clerk*
MRS. HAZEL DONALDSON, *Clerk*
MRS. BILLIE WHITAKER, *Clerk*

STATE LABORATORY OPERATING UNDER
CHAPTER 16083

NALLS BERRYMAN, *Chief Oil Analyst*
C. PERRY COLEMAN, *Assistant Oil Analyst*
SYDNEY D. ANDREWS, *Assistant Oil Analyst*
WILLARD BROOKS, *Assistant Oil Analyst*
DONALD FRISON, *Assistant Oil Analyst*
CLARK DOUGLAS, *Asst. Oil Analyst Field Lab. No. 1-F*
ALFRED ROE, *Clerk Field Laboratory No. 1-F*
JOHN J. BOND, *Asst. Oil Analyst Field Lab. No. 2-B*
JULIAN TURNER, *Clerk Field Lab. No. 2-B*
JACK D. MCALILEY, *Asst. Oil Analyst Field Lab. No. 3-A*
E. D. ROU, JR., *Clerk Field Lab. No. 3-A*
JAS. S. MCCAWLEY, JR., *Asst. Oil Analyst Field Lab. No. 4-C*
RALPH HARMON, *Clerk Field Lab. No. 4-C*

GASOLINE INSPECTION

B. W. BRINSON, *Gasoline Inspector, Madison*
W. E. BUHRMAN, *Gasoline Inspector, Sanford*
P. M. NASWORTHY, *Gasoline Inspector, Tampa*
G. F. FLETCHER, *Gasoline Inspector, St. Petersburg*
W. A. HAILE, *Gasoline Inspector, Gainesville*
ROY HUTCHINSON, *Gasoline Inspector, Tallahassee*
WM. MCCARREL, *Gasoline Inspector, Jacksonville*
ROY NETTLES, *Gasoline Inspector, Tampa*
C. A. PARKER, *Gasoline Inspector, Lakeland*
W. C. GIBSON, *Gasoline Inspector, Miami*
L. S. WARREN, *Gasoline Inspector, Pompano*
GEORGE WILSON, *Gasoline Inspector, Jacksonville*
J. B. WILKERSON, *Gasoline Inspector, Pensacola*
HUGH IGOU, *Gasoline Inspector, Eustis*
TOM NEWNHAM, *Gasoline Inspector, Winter Haven*
E. B. GREEN, *Gasoline Inspector, Ocala*

FERTILIZER INSPECTION

W. A. O'BRYAN, *Statistical Clerk*
W. S. McLIN, *Assistant Statistical Clerk*
J. L. CARROLL, *Fertilizer Inspector, Marianna*

J. W. DAVIS, *Fertilizer Inspector, Ocala*
A. G. COLCORD, *Fertilizer Inspector, Ft. Myers*
R. F. MILLIKIN, *Fertilizer Inspector, Palatka*
R. R. ROPER, *Fertilizer Inspector, Winter Garden*
RUPERT SMITH, *Fertilizer Inspector, Arcadia*

FEED AND COTTONSEED MEAL INSPECTION

ANTONIO DiBONA, *Inspector, Tampa*
J. B. HIERS, *Inspector, Miami*
M. F. MCKAY, *Inspector, Tampa*
O. K. SHEFFIELD, *Inspector, Fort Pierce*
J. B. TAYLOR, *Inspector, Jacksonville*

EGG AND POULTRY INSPECTION

MISS MATTIE G. MOORE, *Registration Clerk*
W. P. ARNOLD, *Inspector, Tallahassee*
H. M. BAKER, *Inspector, West Palm Beach*
HARRY E. BUNKER, *Inspector, Jacksonville*
ROSS COPELAND, *Inspector, Tampa*
C. A. PETERS, *Inspector, Miami*
P. H. MOODY, *Inspector, Palatka*
THOS. J. MULLIN, *Inspector, Miami*
RAY L. HENDRICKS, *Inspector, Orlando*
NORMAN G. NICOLL, *Inspector, Lakeland*
PETER L. ROLLO, *Inspector, Pensacola*
W. W. STROM, *Inspector, Marianna*

MILK AND CREAM INSPECTION

JOHN M. SCOTT, *Chief Milk Inspector, Gainesville*
MRS. DOROTHY BEST GRIFFITH, *Stenographer, Gainesville*
J. M. BURGESS, *Inspector, Tallahassee*
DR. H. H. ROTHE, *Inspector, Gainesville*
LEWIS T. SMITH, *Inspector, Jacksonville*

FROZEN DESSERT INSPECTION

ALEX G. SHAW, *Inspector, Tampa*

INSECTICIDE INSPECTION

F. W. FARNSWORTH, *Chemist*
MISS ZOE D. MANNING, *Stenographer*

SEED TESTING, LABELING AND CERTIFICATION

JOE J. SCHERER, JR., *Analyst*
MILDRED HENRY, *Asst. Analyst*
MRS. FRANKIE WARD, *Clerk*
WILLIAM FLETCHER, *Inspector*

COMMISSIONERS OF AGRICULTURE OF FLORIDA
AS REGISTRAR OF LANDS:

John Beard, January 12, 1847 to May 29, 1849.
David S. Walker, November 23, 1850.
Hugh A. Corley, December 31, 1859 to December 31, 1866.

AS COMMISSIONER OF IMMIGRATION:

Oscar E. Austin, August 1868.
J. S. Adams, January 14, 1869 to January 16, 1873.
Dennis Aegan, March 4, 1873 to December 31, 1876.
Hugh A. Corley, January 3, 1877 to March 16, 1882.
P. W. White, March 16, 1882 to February 12, 1885.

AS COMMISSIONER OF LANDS AND IMMIGRATION:

C. L. Mitchell, March 12, 1885.

AS COMMISSIONER OF AGRICULTURE:

L. B. Wombell, December 1888.
B. E. McLin, January 1, 1901 to March 1, 1912.
W. A. McRae, March 1, 1912 to October 31, 1923.
Nathan Mayo, November 1, 1923.

Some Facts About Florida

BY NATHAN MAYO, *Commissioner of Agriculture*

The dominant features of the development of agriculture in Florida during the last few years have been in the line of increased emphasis on the cultivation of crops heretofore of limited importance, the increase of livestock raising and better marketing facilities.

NEED OF FACTORIES

There have been marked advances in manufacturing in spite of the fact that there is no state office authorized and empowered to make industrial surveys and furnish information as to processes and costs of manufacturing in different lines of industries. In so far as possible with the limited funds at the disposal of this department information has been furnished on the opportunities for new industries in the state. There is a marked need for factories handling certain crops for which there is a demand but which is supplied now by foreign countries. To be specific there is need for a starch factory using a certain variety of sweet potato and cassava. We spend millions for starches imported from the East India islands which could be made in Florida. We have induced several men to look into the possibilities of this industry in Florida. The Federal Bureau of Printing and Engraving is also making inquiries concerning the supply of cassava.

SEA ISLAND COTTON

Conditions have been favorable to the production of Sea Island cotton since an effective method of fighting the boll weevil has been found by various experiments. Because of the limited acreage planted and the demand for the lint at a good price no restrictions have been made on the acreage planted and no loans on the lint to boost the price. The main trouble is to grow enough of it to supply the spinners with a sufficient amount to justify them in depending on the supply to meet their demands.

The poisoning of the plants according to established regulations was efficacious but was tedious and expensive. It has been demonstrated that the best way to eliminate the weevil is to destroy all cotton stalks as soon as the cotton is picked.

The other precaution absolutely necessary to maintain a pure strain of long staple cotton is to not plant both long and short staple varieties close enough for insects to carry the pollen from one patch to the other. This requires a distance of several miles. The patches should also be "rogued" for all spurious specimen stalks that appear in the field. An increase from nothing in 1934 to four thousand bales in this state shows possibilities for this crop. However it does not yield as much per acre as short staple. The price ranges from 25 to 35 cents per pound.

TOBACCO

Tobacco has been grown in Florida for more than a hundred years but it was confined to a few counties and the variety grown was mostly the Sumatra and grown under shade. Other varieties have forged ahead during recent years. Shade-air-cured, dark, flue-cured, bright leaf, sun-cured, dark leaf, and filler tobaccos amounted to a \$4,000,000 crop in 1940.

TUNG OIL

The production of tung oil is looming up as a coming industry. The price is higher than it has ever been because of the disturbance in China. There is a \$20,000,000 market in the United States for this oil and we have been totally dependent on China for the supply. Florida has some 20,000 acres planted to tung trees but in the experimental stage much indifferent selection of soil and bearing specimens of trees resulted in poor yields. Since more judicious selection of both has been adopted the results bid fair to bring profits to the growers. There are approximately 100,000 acres planted to this nut-bearing tree in the gulf-bordering states. There are two mills for crushing of the nuts in Florida—at Gainesville and at Brooker.

BLUEBERRY

North Florida has a native berry that is not only good for table use but is in demand as a remedial agency for stomach disorders. The blueberry has commercial possibilities in this new market.

NEW LETTUCE CROPS

That variety of Iceberg Lettuce best suited to Florida was first grown by a Farm Demonstration Agent, Mr. C. M. Berry, Seminole County. Mr. Ivan Juggar, a Plant Pathologist of the National Department of Agriculture, was located at that time in Sanford. He carried on experiments for three years on Mr. Berry's farm about 12 years ago. He was offered a better position in California and went there to carry on the same experiments. After several seasons of trial at different altitudes and on different soils he produced a variety that he thought would suit Florida, and sent a small package of seed to Mr. Berry at Sanford.

From this small package has come the Iceberg Lettuce of Florida today of which some two thousand acres are planted.

We have been importing 7,000,000 pounds of paprika mostly from Czechoslovakia and are now growing it in Florida. There is no reason for being dependent on that war-torn country, five thousand miles away for a supply of this crop.

RAMIE

Ramie may yet be mastered economically and a new textile enter the field with all other fiber-bearing plants.

CERTIFIED PORTO RICO SWEET POTATOES (1940)

In effort to assist the sweet potato growers in the commercial production of that crop as a safe cash crop for small farmers, the Porto Rican variety of sweet potatoes was suggested by the Florida State Marketing Bureau in 1938, which variety was endorsed by Dr. F. S. Jamison, Truck Horticulturist of the State Experiment Station, Gainesville.

Dr. F. S. Jamison referred us to the University of Louisiana as the best source to obtain the plants or bedding stock about this time last year when several thousand plants were ordered from Louisiana. The desired satisfaction has been realized from this variety.

An effort was made late in the fall of last year to obtain a carload of bedding stock of this variety of sweet potatoes from the Louisiana Sweet Potato Association through Mr. R. H. Daniel, representing that association, but only twenty bushels

could be obtained owing to the heavy booking of orders from the State of Georgia and South Carolina ahead of the Florida order. Mr. Daniel has booked an order for two carloads of their Unit #1 Certified sweet potatoes to be grown by his association this year, stored at harvest in the fall and to be shipped to Florida when advised next winter.

"An order for 500,000 plants of this variety was placed early this Spring with Mr. Daniel; 100,000 of which were promised by May 1st, and 400,000 to be delivered between May 10th and June 1st of this year. Advice has been received that 100,000 will be all the plants they can supply this season about May 1st on account of the continuous cold weather."

MISCELLANEOUS CROPS

A number of new crops are in the experimental stage in the southern part of the state. The Federal government has a station near Miami which introduces new plants from all over the world. Dr. David Fairchild in charge has reported that 20,000 plants have been introduced. No one knows just how many of these will prove to be of commercial importance. We know that scores have already become commercial crops.

We are appending herewith a list of fruits, vegetable and medicinal plants that have been grown by two men: Col. H. W. Johnston of Homestead, Florida, and Mr. Wm. R. Grove of Laurel, Florida. The following list was furnished by Col. Johnston:

RARE TROPICAL TREES AND PLANTS IN THIS GROVE

Ten kinds of oranges, six varieties grapefruit, four varieties limes, two varieties lemons, six varieties tangerines, two varieties tangelos, two citron and one calamondin. Five varieties pineapple, 30 avocado, 20 mango, three fig, 10 papaya, five loquat, 15 guava, five pomegranate, four zizyphus jujube, two tropical mulberry and three cocoa.

Other tropical fruits represented are: Akee, cashew nut, imbu imbu, ambarella, sugar apple, cocoanut, olive, sour sop, Bullock's heart, Llama, pond apple, soncoya, rollinia mucosa, isis gram, Purple and sweet grenadilla, manzanilla, icaco, pitange, jaboticaba, feijoa, jambolan, rose apple, pintamba,

antodesma, litchi, mamoncillo sapodilla (two), white, golden, green and yellow sapote, star apple, canistel, ti-es, locumo, mamee, Rheedia madrone, jak fruit, marang, langsung, averrhoa crambola, tamarind, carissa (Natal Plum 2), karandas, Java plum, unkokolo, tuna, pitaya, date (3), garcinnia, erythroxylon, quitoensis S., quandong, mimusops, balanites, actinidia, mang mao, striknosis spinosa (2), nux vomica, lustania, pithecolobium dulce, satin fruit, cecropia, cudrambia jovoensis, monstera deliciosa, vanilla (2), Arabian coffee (3), beayillia, embloco, tamentossa, jalgans, pemula, cocolobis, pistachio, ramontchi, ratauguresse, lovi-lovi, elephant apple, phylanthus, zicyeum dulaeifiam, physic or Mexican nut, chaya, Malay apple, rambutan, velvet apple, forbidden fruit, moringa, morinda, kei apple, Queensland nut, date plum, passion fruit, ocomba spinosa, genipi, cochin goraka, aloroba, Ceylon olive, wampee, pewa, Java almond, rambia, breadfruit, malphygia, perwiski, bail fruit, domei, nam-nam, wax jambu, anchova pear, water lemon, santol.

LIST OF EDIBLE FRUIT, NUT AND SPICE BEARING TREES, VINES AND SHRUBS ON FARM OF WM. R. GROVE, LAUREL, SARASOTA COUNTY, FLORIDA, JULY 1, 1940.
THE MAJOR PART OF THESE ARE NOT OF BEARING AGE.

CITRUS

No. of Trees	Botanical Name	Common Name
867	Citrus grandis	Grapefruit, Marsh Seedless
22	Citrus grandis	Grapefruit, Pink
2	Citrus grandis	Shaddock
91	Citrus grandis	M'scellaneous
393	Citrus sinensis	Orange, Lu Gim Gong
24	Citrus sinensis	Orange, Washington Navels
5	Citrus sinensis	Orange, Temple
1	Citrus sinensis	Orange, Ruby
1	Citrus sinensis	Orange, Mangerine
1	Citrus sinensis	Orange, Sour
1	Citrus sinensis	Orange, Ring
1	Citrus sinensis	Orange, Bitter sweet
1	Citrus sinensis	Orange, Morcutt Honey
40	Citrus sinensis	Orange, Miscellaneous
5	Citrus sinensis	Orange, Temple
5	Citrus nobilis	Orange, King
1	Citrus unshiu	Orange, Satsuma
2	Citrus deliciosa	Orange, Mandarin
5	Citrus limonia	Lemon, 3 varieties
18	Citrus mitis	Calamondin
260	Citrus hybrid	Kumquat
20	Citrus hybrid	Limequat
251	Citrus hybrid	Limes, Rangpur
2	Citrus aurantifolia	Limes, Key
2	Citrus aurantifolia	Limes, Tahiti
2	Citrus medica	Citron
417	Citrus species	Tangelos, Lake
26	Citrus species	Tangelos, Miscellaneous

TROPICAL AND SUB-TROPICAL EDIBLE FRUIT TREES, VINES, ETC.

No. of Trees	Botanical Name	Common Name
8	<i>Achras sapota</i>	Sapodilla
2	<i>Aegle Marmelos</i>	Bael Fruit
2	<i>Anacardium occidentale</i>	Cashew
100	<i>Ananas sativa</i>	Pineapple
2	<i>Annona Cherimola</i>	Cherimoya, two varieties
10	<i>Annona Squamosa</i>	Sugar Apple
1	<i>Annona reticulata</i>	Custard Apple—Bullock's Heart
1	<i>Annona purpurea</i>	Soncoya
1	<i>Annona paludosa</i>	Chinese Yellow Sugar Apple
1	<i>Annona glabra</i>	Pond Apple
1	<i>Annona senegaliensis</i>	<i>Annona senegaliensis</i>
2	<i>Annona diversifolia</i>	Llama
2	<i>Annona muricata</i>	Soursop
1	<i>Annona montana</i>	Soursop
1	<i>Antidesma bunius</i>	Bignay
1	<i>Artocarpus cummunas</i>	Breadfruit
1	<i>Artocarpus cummunas</i>	Breadnut
4	<i>Artocarpus integrifolia</i>	Jackfruit
2	<i>Averrhoa carambola</i>	Carombola
2	<i>Blighia sapida</i>	Akee
1	<i>Canarium commune</i>	Java Almond
1	<i>Calocarpum mammosum</i>	Mamey Sapote
1	<i>Calocasia sp.</i>	Dasheen
20	<i>Carica papaya</i>	Papaya (several varieties)
180	<i>Carissa grandiflora</i>	Amuntungula
	<i>Carissa karandas</i>	
	<i>Carissa acuminata</i>	
2	<i>Cassia Fistula</i>	Candy Tree—Golden Shower
3	<i>Chrysophyllum Cainito</i>	Star Apple (2 varieties)
1	<i>Cygnosium cymosum</i>	Cygnosium cymosum
1	<i>Crataegus spp.</i>	Manzanilla
2	<i>Clausena lansium</i>	Wampi
1	<i>Cecropia Palmata</i>	Cecropia—Hot Dog Tree
1	<i>Cyphomandra betacea</i>	Tree Tomato
1	<i>Coccoloba uvifera</i>	Sea Grape
1	<i>Coccoloba species</i>	
6	<i>Cocos nucifera</i>	Cocoanut (1 dwarf)
1	<i>Cinnamomum zeylanicum</i>	Cinnamon
2	<i>Coffea excelsa</i>	Coffee
1	<i>Concha Winterena</i>	Spice
8	<i>Casimiroa edulis</i>	White Sapote
4	<i>Calocarpum mammosum</i>	Sapote
2	<i>Dillenia indica</i>	
3	<i>Dovyalis hebecarpa</i>	Ceylon Gooseberry
1	<i>Dovyalis caffra</i>	Umkola
1	<i>Diospyrus discolor</i>	Umkokola
1	<i>Diospyrus embryopteris</i>	Diospyrus embryopteris
2	<i>Diospyrus kaki</i>	Persimmon
3	<i>Euphoria longana</i>	Longan
1	<i>Eleagnus var.</i>	
3	<i>Eleagnus philippensts</i>	Lingaro
14	<i>Eugenia uniflora</i>	Surinam Cherry
2	<i>Eugenia Dombeyi</i>	Grumichama—Brazilian Cherry
2	<i>Eugenia Jambos</i>	Rose Apple
3	<i>Eugenia Jambolan</i>	Jambolan Plum. (2 varieties)
1	<i>Eugenia Klotzschiana</i>	Pero de campo
1	<i>Eugenia Luschnathiana</i>	Pitomba
1	<i>Eugenia malaccensis</i>	Ohia
1	<i>Eugenia coronata</i>	
1	<i>Eugenia Hookeriana</i>	
1	<i>Eugenia edulis sp.</i>	
1	<i>Eugenia Smitti</i>	Unknown
110	<i>Eriobotrya japonica</i>	Loquat
1	<i>Ficus Tibic</i>	Fig
1	<i>Ficus papaya</i>	
2	<i>Flacourtia ramontchi</i>	Governor Plum
2	<i>Feljoa Sellowiana</i>	Feljoa
2	<i>Garcinia Livingstonei</i>	Munkonga
2	<i>Garcinia mangostana</i>	Mangosteen
1	<i>Garcinia spicata</i>	
1	<i>Harpephyllum caffrum</i>	Kafir Plum
1	<i>Hilocereus undatus</i>	Pitaya
1	<i>Hicaria</i>	Spice

No. of Trees	Botanical Name	Common Name
1	<i>Jatropha curcas</i>	Jatropha
1	<i>Jatropha species</i>	Unknown
	<i>Jatropha urens</i>	Spinach Bush
4	<i>Lucuma nervosa</i>	Egg Fruit
1	<i>Lucuma sp.</i>	Giant Egg Fruit
246	<i>Lychee chinensis</i>	Lychee
2	<i>Macadamia ternifolia</i>	Queensland Nut
2	<i>Malpighia glabra</i>	Barbadoes Cherry
1	<i>Mammea Americana</i>	Mamey Apple
2	<i>Melicocca bijuga</i>	Spanish Lime—Mamoncilla
6	<i>Monstera deliciosa</i>	Monstera
1	<i>Morinda Citrafolia</i>	Indian Mulberry
2	<i>Mimousops caffra</i>	Mimousops
1	<i>Mimousops ellengi</i>	
1	<i>Mimousops species</i>	
1	<i>Malpighia sp.</i>	
2	<i>Muntingia calabura</i>	Muntingia
14	<i>Myrciaria cauliflora</i>	Jaboticaba
1	<i>Myrciaria floribunda</i>	Guava berry
1	<i>Myrciaria species</i>	
1	Unknown	Moeinda
20	<i>Musa sp.</i>	Banana (8 varieties)
64	<i>Magnifera indica</i>	Mango (many varieties)
1	<i>Nephelium lappaceum</i>	Rambutan
1	<i>Nanceta</i>	Red Nanceta
1	<i>Opuntia sp.</i>	Tuna
2	<i>Passiflora edulis</i>	Granadilla
2	<i>Passiflora quadrangularis</i>	Giant Granadilla
65	<i>Psidium gaajava</i>	Guava
7	<i>Persea sp.</i>	Avocado
1	<i>Phyllanthus acidus</i>	Otaheite Gooseberry
2	<i>Phyllanthus emblica</i>	Emblica
1	<i>Phyllanthus grandis</i>	
1	<i>Pistacia Leutiscus</i>	Mastic
2	<i>Pleogynium solandra</i>	Burdekin Plum
1	<i>Prunus communis</i>	Almond
1	<i>Prunus salicifolia</i>	Capulin
1	<i>Parmentiera cerifera</i>	Candle Tree

LIST OF AGRICULTURAL PRODUCTS, MOST OF WHICH CAN BE
GROWN IN FLORIDA.

Agave, alfalfa, almonds, annatto, anona, aniseed, apples*, apples (custard), apricots, arbutus, arrowroot, artichokes, acajou nuts (cashew), aloe, amomum.

Balsam, bamboo, bananas, bark (Peruvian), barley, beets, borage, Brazil nuts, bread fruit, broccoli, broom-corn, Brussels sprouts, buckwheat.

Cacao, cactus, camphor, Cape gooseberries, capers, caraguata, cardamoms, cardoon, carobs, carrots, cashew nuts, cassava (tapioca), cassia (tree), castor bean, cauliflower, cedrat, celery, chicle, chicory, chillies, China grass, cinchona (tree), cinnamon, citrons, citronella, clover, cloves, coconuts, coffee, copaiba (tree), copal, copra, coriander, cork-oak (tree) corn, cotton, cucumbers, cumin.

Dates, divi-divi.

Eggplant, eleusine, endive.

Figs, flax, fustick.

Garlic, geraniums, gherkins, ginger, ginseng, gooseberries, gourds, grana-dillas, grapes, gualol (gualoli), uavas, galangal.

Hemp, henequen (sisal), henna, herva matte, hops.

Ibira, Indian figs, Indian lotus, indigo, ipecac.

Jack-fruit, Jerusalem artichokes, jujube, jute, jalap.

Kaffir corn, kapok, ko'a nuts, kumquats.

Lentils, lettuce, licorice, lily bulbs, linseed, litchis, loganberries, lupins.

Magney, mamey, mandioca, mangel, mango, manioc (tapioca), melons, mul-
berry (tree), mustard.

Nectarines, nutmeg.

Oats, olives (olive oil), onions, opium.

Palm oil, papaws, papayas, parsley, passion fruit, patchouli, peaches, pea-nuts, pears, peas, pennistum, peppermint, peppers, persimmons (Japanese and Chinese), pimienta, pineapples, pita, plums, pomegranates, poppies, potatoes, prunes, pumpkins, pyrethrum.

Quince.

Radishes, rape-seed, rice, rubber, rye, rhubarb, red squill.

Saffron, sansevieria, sapodilla, sapota, sarsaparilla, sesame, shallot, sisal (henequen), skirret, sorghum, soya beans, spinach, sumach, sunflower seed, sweet potatoes, squill, sage—Bengal, East Indian, sassafras (tree), senna scilla.

Tamarind, taro, tea, tejocote, tobacco, tung (tree) oil, turmeric, turnips.

Vanilla, vegetable ivory, voandzela.

Walnuts, watermelons, wheat.

Yams, yerba mate, yucca.

Zapotes.

*Do not grow well in warm climate.

PRIMARY LIST OF MEDICINAL PLANTS GROWING IN FLORIDA

Symbols A, B, C, D, E, F, G after the name of the plant refer to the region of the State in which this plant occurs, as indicated on the accompanying map (See Fig. 12).

Name of Plant	Common Name	Locality	Official
1. <i>Aristolochia Serpentina</i>	Snake Root	D	U. S. P.*
2. <i>Betula lenta</i>	Sweet birch	A	U. S. P.
3. <i>Capsicum frutescens</i>	Cayenne pepper	F, G	U. S. P.
4. <i>Brassica nigra</i>	Black mustard	E	U. S. P.
5. <i>Chenopodium ambrosioides</i> var. <i>anthelminticum</i>	American wormseed	F, G	U. S. P.
6. <i>Cinnamomum camphora</i>	Camphor	D, E	U. S. P.
7. <i>Cinnamomum cassia</i>	Cassia cinnamon	E	U. S. P.
8. <i>Citrus medica</i> , var. <i>Limonum</i>	Lemon	E, F, G	U. S. P.
9. <i>Citrus aurantium</i>	Sweet orange	D, E, F, G	U. S. P.
10. <i>Datura Stramonium</i>	Jimson weed	E, G	U. S. P.
11. <i>Gossypium herbaceum</i>	Cotton	A, B, C, D	U. S. P.
12. <i>Liquidambar styraciflua</i>	Sweet gum	A, B, C D, E	U. S. P.
13. <i>Mentha spicata</i>	Spearmint	E	U. S. P.
14. <i>Mentha piperita</i>	Peppermint	E	U. S. P.
15. <i>Monarda punctata</i>	Horsemint	B, C, D, E
16. <i>Pinus palustris</i> and other species	Long leaved pine, loblolly pine, etc.	A, B, C D, E	U. S. P.
17. <i>Podophyllum peltatum</i>	Mandrake	D, E	U. S. P.
18. <i>Prunus serotina</i>	Wild cherry	A, B	U. S. P.
19. <i>Punica granatum</i>	Pomegranate	E, F, G	U. S. P.
20. <i>Rhus galbra</i>	Sumac berries	B	U. S. P.
21. <i>Ricinus communis</i>	Castor bean	A, B, D, E	U. S. P.

IMPORTANT CONSTITUENTS AND PROPERTIES OF PLANTS IN PRIMARY LIST

No. of Plant*	Constituents
1. Oil, sein, bitters	Diuretic, emmenagogue
2. Methyl Salicylate and derivatives	Flavor, antiseptic, analgesic
3. Oil, Resin	Internal — stimulant; external — vesicant
4. Oil	Internal — stimulant, condiment, diaphoretic; external—rebufo- cient
5. Oil	Anthelmintic, vermifuge
6. Camphor	Internal—antiseptic
7. Oil	Carminative, stimulant
8. Oil	Flavor
9. Oil	Flavor
10. Oil and atropine.....	Narcotic, anodyne, mydriatic
11. Hairs; oil	Absorbent, protective; demulcent
12. Balsam	Stimulant, expectorant, diuretic, antiseptic
13. Oil	Carminative, flavor
14. Oil	Carminative, flavor
15. Thymol	Antiseptic, anthelmintic
16. Rosin	Base in plasters, etc.
Turpentine	Antiseptic, anthelmintic; terpin hydrate, expectorant, antiseptic, terebene, inhalant
17. Resin	Cathartic, cholagogue
18. Amygdalin, emulsin, bitters, prussic acid	Pectoral, tonic
19. Pelleteleine tannates	Anthelmintic
20. Tannin	Astringent, diuretic
21. Castor oil	Purgative
22. Oils, resins, sugars	Sedative, diuretic
23. Bitters, oil, resins	Anthelmintic
24. Oil, resin, glucoside	Expectorant, emetic, laxative
25. Vanillin	Perfumery, flavor

* No. of Plant on this list corresponds to the one on the preceding Primary List.

LIVESTOCK

Perhaps no state has progressed as rapidly in the livestock interest so much as Florida during recent years. Because of the tick infestation and the dependence on wild range, the quality of the cattle of this state was one of the lowest of all the states before the eradication of the tick was begun. Since this pest has been eradicated in all but a very few counties the cattle industry took on a new life. Thousands of head of scrub cattle were sold at very low figures, improved breeds and cultivated pastures have brought a revolution in this branch of agriculture in the state.

Improved herds and breeding practices have demonstrated that Florida can be made a real cattle state. The exhibits of beef cattle and dairy cows at our state-wide and local fairs are indeed encouraging.

The value of our herds has increased to such a marked extent that the old scrub herds are fast becoming a thing of the past.

Large ranchers are coming from western cattle states and establishing ranches in Florida. The new breed of Santa Gertrudis is being introduced, and bids fair to rank as a favorite because of its special suitability to Florida climatic conditions. This breed was originated in southern Texas by crossing the best beef herds with the Brahma from India.

It has been discovered that the coarse African grasses can be harvested, chopped and mixed with low grade molasses and make a splendid feed for cattle. The use of molasses with hay for cattle has been practiced for some years in the prairie cattle states.

Florida is especially adapted for this way of feeding. We are a sugar cane producing state and large grasses do well on our soils.

DAIRYING

Our dairy industry has increased by such strides that the home-grown supply of fresh milk kept up with the demand. However, the influx of so many thousands, because of defense

preparation, will doubtless cause a shortage of supplies in the vicinities of the military and aviation stations now being established.

POULTRY

Our influx of tourists, laborers and soldiers will make universal demands on our poultrymen for poultry and eggs. This should insure a market for these products.

FARMERS' MARKETS

The twenty odd Farmers' Markets that have been established throughout the state handled, this last season, approximately \$8,000,000 worth of farm crops. The most of this was vegetables. However, almost every variety of the fruits, berries, nuts, livestock, poultry, eggs, creamery products, tobacco and novelties were included in the list of marketable products of the farm.

These crops found a market all the way from Florida to Canada and including forty of the forty-eight states .

A new point of contact has been provided for the farmer and the buyers of his materials which go into the markets. Transportation facilities are provided now by rail, highway and boat, and the great centers of population can be made in a few hours from any point in the state. All sales are cash.

PART I

Brief Narrative Report

From

Bureaus and Divisions

Within

THE DEPARTMENT OF AGRICULTURE

Bureau of Immigration

By constitutional authority, the State Commissioner of Agriculture is charged with keeping the Bureau of Immigration. In the details of performance of these duties the legislature has, from time to time, made new provisions and regulations that extended the scope of this bureau.

It prepares and edits publications going out from the department, such as special bulletins for farmers, all advertising literature, advertisements in magazines and other publicity for the department. It also prepares all fair exhibits sent out by the department and supervises all enumerations of agriculture and manufacturers. And too, it is empowered to take a population census every ten years. The sixth state census was taken in 1935.

A census has been called a snapshot of the population, and surely it brings to light many interesting facts respecting the people of a given territory. It tells of the distribution of population and can point the way to explanations of the unusual; it throws light upon changes in births, deaths, marriages and other influences in population trends. The census and registration enable us to look into how the population has become what it is: the races, nationality, school age, etc.

In periods of earlier settlement of our country, the term immigration had probably a different meaning from what it now has. The day of vast, herd-like migrations of people to new lands seems to be past. People locating in new homes seek reasons for doing so with more intelligence than was used in past generations. This paves the way for a better development of new land and for the assurance of a better class of citizens where the choice of location is sensibly made.

To this bureau go all letters and inquiries from people who want information about locating in Florida to farm or to follow special lines of agriculture. There are over 100 different publications edited, printed and issued by this office. They are upon a great variety of subjects, the result of a complexity of interests such as is found in the diversity of agriculture in

Florida. Tons of mailing matter are sent out yearly to give information upon these subjects and millions of copies have been circulated in recent years.

These publications require special work in their preparation and, while the department in preparing them, seeks specialized information and data where advisable, it does not conduct experiments for complete and exhaustive data on any one product or line. It requires, of course, that the data be exact and authentic, and have real value as information, but the purpose in issuing its bulletins differ from those of other bureaus and departments. It seeks to inform those wishing general information on special subjects. Experimental farming is not included in the activities of this department, but is done by the State Experiment Station.

This emphasizes the distinction between this department's work and that of other governmental branches, such as the work of the experiment stations of the state government. There are no farming experiments conducted by the State Department of Agriculture. This is done under the college of agriculture of the University of Florida. Nor are crop production estimates made and yearly crop statistics given out by this office; but a census—Agriculture and Manufacturers—is taken every five years and the results are compiled and enumerated by the bureau of immigration. Only recently released under separate covers have been the Agricultural Census for 1937 and the Industrial Census for the same period.

Fairs and exhibits at show places for advertising the state are included in the activities of this office. The exposition at Chicago, "A Century of Progress," in which Florida participated and which was attended by more than 38,000,000 people, was one of the great accomplishments of this decade. Its educational value was great and Florida's identification with this enterprise was of inestimable value to our state in an advertising way. An exhibit was placed in Rockefeller Center in 1935-1936; Cleveland, Ohio, in 1936, and at Birmingham, Ala., Summer of 1936; the World's Fair in New York in 1939-1940.

The advertising of this bureau has had much to do with the tourist trade. The state collects a large part of its taxes from gasoline, much of which is consumed by tourists.

Division of State Markets

The Commissioner of Agriculture has for many years been impressed with the necessity of providing the farmers of Florida with an opportunity to find proper markets for their products. He feels that the construction of meeting places where the farmer and the buyer could meet and trade with each other would be the best means of accomplishing this purpose. The first difficulty the Commissioner had to face was the method of obtaining the money for their construction but when the relief agencies were formed by the Federal Government a successful effort was made in financing the construction of the first market at Sanford. The Sanford market was dedicated on December 18, 1934, and was opened for business January 15, 1935. From the beginning this market has been a success and since that time 26 more have been constructed.

Pretty fast work, but the members of the State Agricultural Marketing Board, under the leadership of the Commissioner, believed it would be a good idea to make progress as rapidly as possible while the W. P. A. and the preceding agencies were in operation. There is no question but that this was a wise decision for now it is doubtful if the W. P. A. or succeeding Government agencies will be in position to render as much assistance as they have in the past.

On the whole, the State market system has been a remarkable success. With 24 markets in operation, only three or four of them have not yet been able to take in enough money in fees and concession rentals to pay their operating expenses. During the fiscal year, ending June 30, 1940, over \$8,000,000 worth of business was handled through these markets and the operating expenses in handling this business was less than three-fourths of 1% of the sales. Each year the market system has operated at an increasing gross profit.

It will be difficult to explain each market in detail and will consume more space in this report perhaps than is warranted but on the whole, when a particular district was decided upon as a good location for a market, the Board endeavored to secure

a large enough piece of well located real estate to take care of the present demands and also those anticipated in the future. It is necessary under the laws which provide the authorization to build these markets for the Board to make a set-up where the State would not be called upon to pay any portion of the operating expenses. For that reason a system of fees was set up for the farmer and for the buyer to pay for the services they received, also concession privileges and platform space were rented.

After the real estate for each market had been donated to the Board, the proper type of buildings were designed and constructed by the W. P. A. After the buildings have been completed, the State Road Department has cooperated by doing most of the paving work that was necessary. Since no two markets are alike and each district in which a market is located has some specialty crop, the necessity of designing these buildings has been a problem but on the whole the markets as they now exist seem to have been properly equipped.

The success of the Board's efforts in the construction and operation of these markets has been phenomenal. Curiously enough, in these few districts where the actual operation expenses have not yet been fully earned the actual fact that a state-owned and operated market is available has raised and stabilized the prices to the farmer so that their presence and the expenditure which was necessary to build them has been well worth while.

The actual method of operating the markets differs with the demand and services that had already been created in the community in which each market is located and with the products that are raised in each community. Most of our markets are located in communities which produce vegetables for sale to northern buyers. These required locations and buildings that could be used by both rail and truck transportation methods. At most of the markets the farmer makes this own sale under the guidance of the market manager but in several the auction system is used. An important type of market is that in which live stock is sold. Some of these live stock markets are located on property where other products are dealt

in but in other places the Board has erected only the live stock conveniences. Selling of all live stock is by auction.

The Board is working on a problem which is difficult to solve, that is the problem of handling products which are raised on the farms located in North Florida where feed, grain, peanuts, and things of that sort are the principal agricultural output. The bulkiness of these products, the moderately low price at which they are sold, and the fact that no well organized system of buying has been introduced, has made this the most difficult problem we have.

All of the State Markets are operated on the principal that the State must not "go into business." We make a special effort not to set up any agency that will compete with already existing private business. In fact, the markets have rendered service to legitimate buyers which is equal to the service that has been rendered to the farmers. Even in the case of the concession leases, the markets have leaned over backwards in their endeavor to refrain from setting up such competition.

It is probable that the Marketing Board has about reached the position where there are enough markets. With the 24 that are in operation and with several now under construction, together with plans for two or three more, we will probably be able to meet the present demand.

On the other hand, there is not a market in the entire system which does not actually need important additions and it is hoped that these additions, or some of them at least, may be constructed sometime in the near future.

ARCADIA—

This is strictly a live stock market, specializing in the sale of calves though other live stock is also received for sale. During the fiscal year under review, this market sold \$100,210.43 worth of live stock. It is not open except during the calf season and has no concessions under lease. Selling is entirely by auction.

BONIFAY—

This is a cooperative hog selling market and is operated by the Holmes County Swine Growers' Association, a cooperative

association. So far nothing but hogs have been sold and during the fiscal year their sales amounted to \$21,755.02. Selling is entirely by auction.

BRANFORD—

This is a small market that was constructed for the purpose of holding turkey auction sales. It was not operated last year but it is the hope of the Board that we can bring it back into operation during the coming year. It is planned to do the selling by auction.

BUSHNELL—

This market has a 400 ft. selling shed equipped with cold storage conveniences, a vegetable packing shed and a live stock market. A local cooperative organization has erected a Sea Island Cotton gin on the property. During the last year this market sold \$59,783.50 in vegetables and \$41,627.32 in live stock. Both auction and private selling are used in selling vegetables with live stock auction only.

CHIPLEY—

At this market the State has constructed a creamery which is being operated by the West Florida Creamery and Produce Company and has been of great benefit to the farmers in providing them with a market for their surplus milk. It also operates as a selling station for eggs and chickens and has recently been provided with a sweet potato curing plant. There is also a small cooperative live stock market on the property.

COCOA—

During the last session of the legislature, the State Agricultural Marketing Board was commanded to construct a series of citrus wash houses but the Board was enjoined from proceeding with this work. A small wash house was built at Cocoa under this law but after the injunction was granted it could not be used. The Board is endeavoring to find some method of using this plant for the sale of vegetables.

DADE CITY—

The Board has constructed a beautiful stone building for the purpose of making Dade City the center of a chicken and

egg business for that locality. This market is not yet in operation.

DE FUNIAK SPRINGS—

We were erecting a livestock market in the above city during the fiscal year, though it was not operated until after July 1st. As this report is being written, we are glad to say that the operation of this market has been a great success, and a detailed account will appear in our next year's report.

FLORIDA CITY—

At this location on a 20 acre tract a 400 ft. market shed and a 200 ft. loading shed have been erected. The market was opened in the latter part of the season just prior to the freeze but actually did do \$120,713.65 worth of business. The concessions are telegraph, telephone, restaurant, and recently a filling station. Also the State Welfare Board has presented this market with a complete set of machinery sufficient to operate a vegetable cannery. At present we do not have a building for this purpose but it is hoped we can establish this cannery in the near future. Buyers rent space on the platform and trade direct with the farmer.

FORT PIERCE—

This market was under construction during the fiscal year and was placed in operation in November, 1940. It consists of 600 ft. of open shed and an office building which will include a store for retail sale of Home Products. There is also on this property a building which was constructed as a citrus wash house. This building is being leased during the spring of 1941 for the purpose of grading and packing vegetables. Both buyers and farmers rent space on the platforms. The concessions are telegraph, telephone, restaurant and filling station.

HOLLY HILL—

On the theory that the farm woman deserves as much consideration as the man, we have built a beautiful stone building here in a good location and are using it for the purpose of a curb market as well as for retail sales of Home Products. The curb market is the successor of one which has occupied approximately this same location for a number of years. The

Board is not only selling Home Products at this market but with the assistance of the State Board of Public Instruction is teaching handicraft work to those who desire to learn. The curb market sales are direct from the producer to the consumer.

JAY—

During the fiscal year under consideration a live stock market was constructed in this location. It was not placed in operation, however, until after July 1st but as this report is being written we will be pardoned if we say this market has been a great success. Selling is done entirely by auction.

LA BELLE—

A live stock market has been built in this location and connected therewith a small shed which can be used by the local farmers for the purpose of selling fruit or vegetables raised nearby. The live stock market was operated only a portion of the fiscal year and the sales amounted to \$8,623.55. The vegetable shed is not yet in use. Selling is done entirely by auction.

LAKE CITY—

In this location the Board has erected a fire proof building of brick and concrete 100 ft. wide and 400 ft. long. It was not finished during the fiscal year but is designed for selling tobacco and for the sale and storage of cotton, also for any other use that might prove desirable. So far tobacco has been sold by auction.

LIVE OAK—

At Live Oak we have strictly a tobacco market, one of the first to be built in the State and a highly successful one over a period of four years. The size of this building is 100 ft. by 600 ft. During the fiscal year \$238,126.92 worth of tobacco was sold from the floors of this market. So far tobacco has been sold by auction only.

MARIANNA—

This is one of the markets at which we are planning to sell general farm products but in the beginning it has been used for the purpose of selling locally raised vegetables, watermelons,

sweet potatoes, chickens and eggs. The market consists of a shed 400 ft. long (since July 1, 1940, the market was burned down but is being replaced with a similar building). The market manager does the selling on a commission basis.

OCALA—

In this location the State has constructed a market shed 400 ft. long, equipped with cold storage facilities, also a modern abattoir. The latter facility has been leased to Swift and Company but the State is operating the vegetable shed for handling fruit and vegetables, as well as the cold storage. Recently this market has been provided with machinery for grinding feed and has been used at short periods each year for the storage of peanuts. Concessions are telegraph, telephone, restaurant, filling station. Sales during the past fiscal year have been: meat, \$775,029.47; fruit and vegetables, \$35,295.95. The market manager does the selling on a commission basis.

PAHOKEE—

We have a large market under construction at this location but construction was interrupted by the W. P. A. after the completion of 500 feet of shed. However, the Marketing Board, with the help of the State Road Department, is proceeding with the construction of facilities that will probably render this 500 feet available for use late in the 1941 spring season or certainly for the fall season of that same year.

PALATKA—

At this market the State has constructed a 400 ft. vegetable shed equipped with cold storage, a live stock market, a packing shed which is being operated by George and C. E. Currie as a citrus packing plant, and a meat curing plant. This market has also been used as a gathering point for cabbage from which sauerkraut is made and it is hoped that we will soon be able to construct a kraut plant on the property. During the fiscal year live stock sales at this market amounted to \$72,124.76, fruit and vegetables \$44,589.22. The market manager does the selling on a commission basis. Concessions are telegraph, telephone, restaurant, filling station, and packing plant building rental. The market also receives fees from a truck scale.

PALMETTO—

This building consists of a vegetable shed somewhat wider than the others being operated by the Board and 400 ft. long. The tomato crop is the specialty crop though other things are sold. During the past year the total sales amounted to \$89,767.65. Selling is done here by both auction and private sale from the farmer to the buyer. The State has provided tomato grading and packing machinery which is being used by both farmers and buyers. Concessions are telegraph, telephone and restaurant.

PLANT CITY—

This is the largest market in the system, having more space under roof than any other market we have. The buildings are: selling shed 400 ft. by 600 ft., two packing and general sheds 58 ft. by 600 feet, a 200 ft. by 400 ft. loading shed, a cattle market, a shop and warehouse, and a fine office building. Concessions are: telegraph, telephone, restaurant, filling station, platform space rentals, land rental for ice plant and peddlers' licenses. During the last year the sales of this market were \$2,022,138.69. This market is operated as a "farmers' auction" with the farmer presenting his produce to all the buyers and accepting the best bid.

POMPANO—

Though Plant City is the largest market under roof, Pompano has the largest vegetable selling shed, we believe, in the world. It is 100 ft. wide by 1,018 ft. long. It also has a splendid office building from which it receives an income from office rentals. Other concessions are: truck fees, platform space rental, telegraph, telephone, restaurant, peddlers' rental. Though this market was not in operation during the entire vegetable season in the fiscal year, sales amounted to \$2,194,297.65. Farmers rent space on the platform and sell direct to the buyers.

SANFORD—

This is the oldest market. It consists of a 600 ft. open platform, a building which is leased to a citrus packing plant, a separate restaurant building and a set of platform scales. Selling is done largely by farmers dealing direct with the

buyers who in turn sell to northern brokers. Concessions consist of platform rental, telegraph, telephone, restaurant, barber shop, and the market receives income from its truck scales. During the last fiscal year this market sold \$74,823.48 worth of citrus and \$564,608.20 worth of vegetables.

STARKE—

This market consists of a 400 ft. shed with cold storage facilities. Selling is done both by auction and private sale from the farmer to the buyer. Concessions consist of a restaurant and lease of cold storage space, ground lease for a building in which to store packages. During the last year sales of this market amounted to \$277,802.80. (Since the construction of Camp Blanding, this market has become a center for these sales.)

TITUSVILLE—

This consists of a small coquina rock building located on the main highway. It is a retail market devoted to the sale of products produced largely by women. It consists of a small curb selling space and a sales room for home products, together with a small space in the rear for wholesale business. There is also an orange juice stand on the highway.

TALLAHASSEE—

This market was erected with the idea of selling live stock but it has not yet proven to be a success and has temporarily closed.

PENSACOLA—

The Board built this market in the hope that the local vegetable growers could use it for the purpose of selling their produce and also that the retailers in the City of Pensacola could use it as a wholesale market. For a number of reasons, particularly the location, this market has not been successful. The Board is considering its removal to a better location.

WAUCHULA—

This market consists of an "L" shaped building with 400 ft. of platform, a 100 ft. open shed for private sales, a vegetable packing plant equipped with tomato grading and pack-

ing machinery, and a small office building. Selling at this market is almost entirely by auction although the buyers are given an opportunity to resell to brokers. Vegetables are packed at a figure slightly above cost for both the farmer and buyer. During the last fiscal year sales amounted to \$422,536.44.

State Marketing Bureau

The Bureau is an old and well established department, one of the pioneer Marketing Bureaus in the United States, this being its twenty-fourth year of service. It has thoroughly demonstrated its indispensability to the agricultural industry of Florida, and its usefulness and efficiency are attested by the thousands regularly benefitted by its help. Some of the major projects of the department will be mentioned.

MARKET NEWS SERVICE

The Market News Service rendered by the Florida State Marketing Bureau is a part of, and in cooperation with, the U. S. Agricultural Market News Service, a nation-wide crop and live stock reporting system which gives market condition and price information on more than one hundred agricultural commodities, over 7,500 miles of leased wires. The problem of selecting and broadening market outlets requires varied information—providing accurate official data as to supply, demand, competition; shipments by rail, boat and truck; passings, arrivals, unloads, acreage, storage holdings, prevailing quotations, and other detailed market information which individual farmers and even the larger marketing agencies are not in position to collect for themselves.

FEDERAL-STATE INSPECTION

Federal-State Inspection which provides shipping point inspection, now includes grade and condition inspection and has the remarkable record of having increased from 166 cars in 1922 to the equivalent of 85,556 cars during the 1939-1940 season.

FOR SALE, WANT AND EXCHANGE BULLETIN

The For Sale, Want and Exchange Bulletin,—“the poor man’s library”—published semi-monthly by the State Marketing Bureau, now has an average unsolicited circulation of 25,000. It is posted in public offices, markets, warehouses, etc.; is read by no less than 100,000 people. It is one of the most popular agricultural services in the State, specializing in the sale of items that otherwise have limited market outlets, largely disposed

of by means unavailable elsewhere, listed mainly by parties unable to absorb cost of commercial publication advertising. It is mailed free of charge to the agricultural people of the State.

ACTIVITIES OF THE MARKETING SPECIALISTS

The Marketing Bureau employs several Marketing Specialists, one each covering the following fields of service: Market News Service, Livestock and Field Crops, Poultry and Dairy, Fruits and Vegetables. These men work in close cooperation with the Department of Agriculture, of which the Marketing Bureau is a subdivision, and renders valuable services in their respective fields.

During the past two years they have represented the Department of Agriculture at Poultry and Egg Shows, Dairy Cattle and Beef Cattle Shows, and work in connection with the Agricultural Committees of the several Counties sponsoring County Fairs in order to educate the people and inspire them to raise better stock, better chickens and better crops.

Information is given by these specialists in the matter of price quotations; creation of market facilities, methods of packing; locker storage movement. During the past year they cooperated with the Department of Agriculture and the Florida Experiment Station in operating a "Livestock, Forestry and Pasture Train" exhibiting dairy cattle, beef cattle, hogs, poultry and eggs. This train was visited by thousands of farmers and other interested parties and is considered by all who visited it as a great educational feature.

ACTIVITIES OF THE COMMISSIONER AND ASSISTANT COMMISSIONER

The administrative duties of the State Marketing Bureau is in the hands of the Commissioner and an Assistant Commissioner whose function it is to direct the office work such as keeping records, buying supplies and all supervisory work.

The Marketing Commissioner and his Assistant direct the handling of all Departments such as marketing services, adjustment of claims and accounts, printing of the bulletins and guide the field work of the Marketing Specialists.

In addition to his administrative duties as head of the State Marketing Bureau, the Marketing Commissioner is also Secretary to the State Agricultural Marketing Board and as such, he acts in the capacity of public relations man in helping to organize the various State Farmers' Wholesale Markets.

SUMMARY AND CONCLUSION

There have been 24 marketing and shipping seasons since the Marketing Bureau was established. All soil products produced and harvested during this 24-year period have an approximate total value of \$3,100,000,000. Agricultural sales and purchases during that time have amounted to no less than \$2,200,000,000. It is believed that the Marketing Bureau has rendered some kind of beneficial service on as much as \$1,800,000,000 of these sales and purchases, or an average—for the entire 24 seasons—of \$75,000,000. At present they are touching, with market news, inspection, services of the Marketing Specialists, "For Sale, Want and Exchange Bulletin," marketing advice and assistance, and helping in the sale and purchase of commodities valued at no less than \$150,000,000 a year, and we are proud of the record.

The foregoing Twelfth Biennial Report of the Florida State Marketing Bureau is respectfully submitted with the understanding that any supplementary data required will be cheerfully supplied. Funds appropriated from the General Inspection Fund by the Legislature have been carefully and economically expended by the Bureau, and it has operated within the limits without incurring deficits, on both the current biennial period and all previous ones.

Inspection Bureau

A SUMMARY OF FLORIDA INSPECTION LAWS AND THEIR ENFORCEMENT

From time to time the Florida State Legislature has enacted regulatory laws and placed them under the Commissioner of Agriculture for enforcement. By the authority of these laws the Department of Agriculture is able to exercise control over gasoline, citrus fruit, fertilizer, stock feed, dairy products, eggs, poultry, insecticides and fungicides, food, drugs and seeds. A brief summary of each of these laws is given below.

1. CITRUS INSPECTION LAWS.

Citrus fruit, Florida's largest single soil crop, brings in approximately seventy million dollars a year. The Citrus Inspection Laws require Florida packing houses to register with the Department of Agriculture and make their fruit accessible for inspection by authorized inspectors who examine the fruit to determine whether it passes maturity tests. In addition to this precautionary measure, eight stations are placed at strategic road outlets and road guards are on twenty-four hour duty to check each truck load of fruit destined for out-of-state markets. Fruit found without evidence of official inspection and approval is seized. This service is usually begun early in September and continued through the following June. During the 1939-1940 season 40,186,627 boxes of oranges, grapefruit and tangerines were inspected.

2. COMMERCIAL FERTILIZER LAW.

The fertilizer used annually on Florida groves and farms is valued at from fifteen to twenty million dollars. Under the Commercial Fertilizer Law each brand of fertilizer, showing its guaranteed analysis, is required to be registered with the State Department of Agriculture prior to being offered for sale in the State of Florida. There were over nine thousand separate brands of commercial fertilizer registered during the 1939-1940 registration year. Each bag of fertilizer sold in Florida is required to have attached a tag showing payment of the inspection fee on one side, and on the reverse side the guaranteed analysis of the product exactly as it appears on the certificate of registration covering the brand on file in the Inspection Bureau. Inspectors located at different points over the state are constantly drawing samples from fertilizer found in possession of retail dealers, warehouses, mixing plants and growers and sending them to the State Chemist in Tallahassee for

analysis. When a sample is reported deficient, the inspector is instructed to place a seizure notice on the lot from which the sample was taken, and further sale is prohibited until such time as the product is brought up to the guaranteed analysis. This usually entails returning the goods to the manufacturer for reworking.

Each month the Fertilizer Statistical Division of the Bureau of Inspection compiles and distributes the statistics regarding consumption of Mixed Fertilizers by county and by formula. In addition, the Division compiles and distributes statistics regarding the consumption of fertilizer materials by counties.

3. COMMERCIAL FEED LAW.

In enforcing the Commercial Feed Law the same procedure as to registration, tagging, sampling and analysis applies as in the case of the Commercial Fertilizer Law. The annual consumption of stock feed in Florida represents approximately 375,000 tons with a value amounting to several million dollars. Shipments of "bootleg" feed found without tags are subject to seizure and sale by the sheriff in the county where found. Adulterated or spoiled feeds not meeting the standards fixed by State law are subject to seizure and destruction.

It is interesting to note that in recent years there has been a rapidly increasing sale of dog feed in Florida. Special rules and regulations governing dog feed are now in effect with emphasis upon the control of canned dog feeds consisting largely of meats.

4. FLORIDA EGG LAW.

The Florida Egg Law requires each person who offers for sale more than one case of eggs a week, to secure a dealer's certificate from the Department of Agriculture. In making application for this certificate he pledges himself to observe the requirements, rules and regulations of the law, which greatly protect the consumer of eggs, and materially benefit the producer by compelling him to tell the truth about his products—thus encouraging him to produce and sell quality products. Since the enactment of the Florida Egg Law in 1935, a case of eggs offered for sale on the Florida market must bear an official inspection fee case label on which must be declared the date when the eggs were packed, the name and address of the packer, the grade, size and quality of the eggs, and the state of origin. There are twelve egg inspectors located at strategic points over the state where they can watch closely over the shipments of eggs arriving in Florida from other states, as well as the shipments distributed by large packers within the state. Not only large wholesale houses but small retail stores,

rural stores and curb markets are carefully watched to detect and correct violations of the law. When an inspector finds a dealer violating the Egg Law that dealer is punished by having his products placed under seizure, and frequently wide publicity given to his misdemeanor. During the season of heaviest production, the Department of Agriculture has road patrolmen who patrol the highways leading into Florida from other states and inspect heavy shipments of eggs for proper labeling and quality.

5. FLORIDA POULTRY LAW.

Under the authority of the Florida Poultry Law, the Inspection Bureau, through its inspectors, is able to maintain close check over the sale of poultry on the Florida market. Slaughtered fowl is required to be labeled showing the weight (live weight, dressed weight or dressed and drawn weight), and the price per pound. It is the duty of the inspector to see that the weight is correctly declared and the classification correctly stated according to specifications set up in the Poultry Law. It is also the duty of the inspector to determine whether fowl offered for sale is free from diseases, excessive bruising, multiple bone breaks and otherwise in good, edible condition. The poultry industry in Florida is rapidly becoming a major industry and it is believed that the benefits derived from the Egg and Poultry Laws are largely responsible.

6. FROZEN DESSERTS LAW.

The Frozen Desserts Law was enacted by the 1935 Legislature and is being enforced by State Milk Inspectors. Every dairy, milk plant and ice cream plant in the State is given regular inspection in order to assure that the milk products purchased by Florida consumers meet the standards set up by law.

7. GASOLINE INSPECTION LAW.

Florida motorists spend about seventy-five million dollars a year for gasoline. There are more than 7,500 retail stations in Florida selling over 350,000,000 gallons of gasoline annually. To protect the motorists who use this enormous quantity of gasoline each year, the State Department of Agriculture maintains four traveling laboratories, each manned by two competent chemists, for the purpose of calling on every retail service station in Florida as often as possible (usually about twice a year), and analyzing samples from each retail tank to determine whether or not the gasoline being dispensed therefrom meets State standards. The regular inspector located in the county in which the traveling laboratory stops draws samples from every retail station in the county and submits them to the chem-

ists on the traveling laboratory for analyses. When a sample is found stale or contaminated, the inspector immediately locks up the pump from which such sample was drawn and no further gas is dispensed through that pump until the sample has been sent to the main laboratory at Tallahassee for check test. If the findings of the Chief Oil Analyst coincide with those of the traveling chemists, the gasoline in question is withdrawn from retail sale and disposed of according to provisions of law. Thus the motorists are protected against inferior motor fuel. The State of Florida does not confine its efforts of control to the checking of retail stations. A sample is drawn from every cargo of gasoline that is discharged into terminal tanks at Florida ports and sent to the main laboratory at Tallahassee for analyses. If the analyses shows the product to be out of line with State requirements, the entire cargo is traced to its various distribution points and seized. Deliberate adulteration of gasoline, or a deliberate attempt to defraud the public, constitutes a violation of the Gasoline Inspection Law and violators are prosecuted in proper courts.

When the traveling laboratory leaves a county, the inspector then resumes his regular duty of checking the mechanism of the pumps at retail stations to insure the motorists receiving full and accurate gallonage. A record of each of the 17,000 and more pumps in service in the State of Florida is kept in the central office at Tallahassee, and its condition is checked and reported at least four times during a year. It is believed that Florida affords better all-round, year-round protection for its motorists than any other state in the Union.

8. INSECTICIDE AND FUNGICIDE LAW.

The 1937 Legislature enacted an Insecticide and Fungicide Law for the control and regulation of insecticides and fungicides sold in the State of Florida. As in the case of fertilizers and feeds, all agricultural insecticides and fungicides are required to be registered with the State Department of Agriculture which enables the department to keep a close check on them and see that the citrus grower, the farmer and horticulturist receives quality products that are in line with State specifications.

9. MILK AND MILK PRODUCTS LAW.

Under the Milk and Milk Products Law the closest possible inspection is made of dairy herds, the equipment in dairy barns and the sanitation of milk vessels. Every possible precaution is taken to safeguard milk and milk products. Fifteen years ago Florida imported several million dollars worth of milk and dairy products annually; today, while it does not supply the bulk of butter and cheese consumed, Florida produces every gallon of fluid milk consumed within its borders.

10. PURE FOOD AND DRUGS LAW.

Analytical work to determine the quality of food products is carried on by the State Chemist, aided by the field inspectors. Samples of canned and packaged goods of every description, soft drinks, bakery products, and practically all staple and specialized food commodities are examined by food chemists. When harmful ingredients, deterioration, decomposition or staleness, are detected the lot from which the sample was drawn is immediately seized and destroyed. Inspection Bureau records show aggregate seizures and destruction of several million packages of inedible food products in recent years. It is the hope of the Department of Agriculture to extend the scope of food control work to effect more adequate protection against short weights, counterfeit products and deleterious foods. Since there is no Weights and Measures Law in the State of Florida, the department is compelled to work under serious handicap. However, the food inspectors have been equipped with a set of weights, certified by the National Bureau of Standards, with which they can determine the accuracy of scales and, under authority of the State Pure Food Law, make seizure of packages which are found short in weight.

11. FLORIDA SEED LAWS.

The 1939 Legislature enacted two seed Laws, the Florida Pure Seed Labeling Law, and the Florida Certification Seed Law.

The Florida Pure Seed Labeling Law provides for the control over field and grass seeds, and vegetable seeds. Under this law an annual license fee of \$10.00 is required of wholesalers, and an annual license fee of \$1.00 is required of retailers. Tagging of all field, grass and vegetable seed is required so as to show the name of seedsmen, the percentages of germination, purity, weed seed, inert matter, other crop seed, noxious weed seed, and other information important to growers. A laboratory has been established in the Department of Agriculture building at Tallahassee, in which two competent seed analysts are busy making tests to determine germination, purity and other factors vital as to seeds. Many lots of inferior seeds have already been apprehended and their sale stopped in Florida. The work is just getting under way, and while real progress has been made, a more effective program of control is under contemplation.

The Florida Certification Seed Law provides for the growing, under competent supervision, of seed crops of pure strains, the examination of fields during the growing seasons for the elimination of off-type plants, supervision of the harvesting and processing of the seed, careful tests for germinating quality and

sealing of seed packages under certification by the official seed inspector. During 1940 supervision was exercised over several hundred acres of long staple Sea Island cotton and special varieties of watermelons were grown for seed purposes. The benefits of thorough certification work are obvious to all well-informed seedsmen and agricultural workers.

SOURCES OF REVENUE.

The State Department of Agriculture is entirely self-sustaining, the work being financed by an inspection fee of one-eighth of one cent a gallon on gasoline, twenty-five cents a ton on fertilizer and stock feed, four cents a thirty-dozen case on eggs, a manufacturer's license fee of one hundred and twenty-five dollars and a registration fee of two dollars and fifty cents on insecticides and fungicides, a wholesale license of fifty dollars and a retail license of ten dollars, on frozen desserts, and an inspection fee collected on citrus fruit during the shipping season. During the height of the citrus shipping season we sometimes have from two to three hundred men employed as Inspectors, but the year-round field force aggregates less than sixty men. Into the hands of these men, at the direction of the central office in Tallahassee, is placed the supervision of the products constituting Florida's major industries; and in many instances the health and welfare of the people of the state depends on the faithful and conscientious application to duty of the State Inspector.

In order that some insight may be gained as to the activities of the inspection services, prepared below is a partial summary of six divisions of operation as follows:

	July 1, 1938 to June 30, 1939	July 1, 1939 to June 30, 1940
FOOD AND DRUGS—COSMETICS		
Number of Inspections	25,259	26,706
Impure or Adulterated pkgs. destroyed	70,996	55,769
Packages Stop-saled	46,975	33,869
Samples drawn	730	714
GASOLINE AND KEROSENE		
Number of Inspections	39,643	42,123
Pumps tested	77,231	73,889
Pumps slightly inaccurate	1,302	1,460
Pumps condemned	896	731
Samples drawn	31,864	36,217
FERTILIZER		
Wholesale stocks inspected	914	847
Retail stocks inspected	2,401	2,192
Consumers called on	2,138	3,074
Samples drawn	2,415	2,642
Tons stop-saled for deficiency	103	74
Tons stop-saled for improper tag	40	24
FEED		
Wholesale stocks inspected	1,432	980
Retail stocks inspected	13,020	18,832
Consumers called on	1,040	1,526
Samples drawn	571	1,016
Tons stop-saled for deficiency	1,938	42
Tons stop-saled for improper tag	10,292	181
INSECTICIDE AND FUNGICIDE		
Wholesale stocks inspected	313	321
Retail stocks inspected	962	1,006
Consumers called on	946	1,204
Samples drawn	581	457
Gallons stop-saled for deficiency		3,952
Pounds stop-saled for deficiency	3,765	26,700
SEED		
Wholesale stocks inspected	No Seed Law	61
Retail stocks inspected	1938-1939	163
Consumers called on		92
Samples drawn		355
EGGS		
Wholesale inspections	3,069	3,561
Retail inspections	27,012	28,185
Cases stop-saled for improper label	1,156	1,390
Cases stop-saled for deterioration	528	125
POULTRY		
Live stocks inspected	11,431	11,490
Cold storage stocks inspected	1,144	1,196
Fresh dressed stocks inspected	4,307	3,787
Birds stop-saled account unfit for consumption	20

BIENNIAL REPORT OF
The Milk Inspection Division
STATE DEPARTMENT OF AGRICULTURE

With Offices at Gainesville, Florida
July 1, 1938 to June 30, 1940

The dairy industry and the ice cream industry of Florida are under the supervision of the Milk Inspection Division of the State Department of Agriculture. This Division is composed of a Chief Milk Inspector, with offices in Gainesville, and four assistants located at the following points in the State: Jacksonville, Tampa, Tallahassee and Gainesville.

Due to the nature of their work supervisor would perhaps be a more fitting title for these men than inspector. They combine their routine inspection of equipment and methods in the dairies, milk plants and ice cream plants with suggestions for improvements that will bring about not only the complete sanitary condition that is so important in handling dairy products but also will in most cases bring about more efficient operation of their businesses. Efficiency insures sanitation. The inspectors are qualified to give such advice and suggestions by their education, their training in actual operation of dairies and plants, and their constant association with dairy-men and plant operators and their successes and failures. No change has been made in the personnel of this Division for nine years, with the exception of the addition of one inspector four years ago. The dairy industry of Florida has grown from a minor one when this Division was established eleven years ago to one of the leading industries of the State, and the problems of a rapidly growing industry have been those requiring solution by this Division.

There are 842 dairies in the State of Florida; this number includes 10 goat dairies. There are 244 wholesale dairies and 598 retail dairies. Of this number of retail dairies, there are 176 operating pasteurizers at their farms.

There are 46 city milk plants in Florida. 17 of these are producer-distributors, that is, they secure part or all of their milk from dairies operated by themselves. 7 of these plants handle their own products almost exclusively.

In addition to the 46 city plants, there are 4 cold storage plants from which dairy products are distributed; no processing of any kind is done in these plants—the products are sold in the containers in which they are received. One of these plants is being equipped at this time as a processing plant, but it has not yet been opened for business.

There is also one creamery in the State of Florida, located at Chipley, Florida. Although many of the dairies and milk plants manufacture butter when they have a surplus of milk or cream, the Chipley plant is the only butter-making plant in Florida.

Condensed milk and powdered milk are manufactured on a small scale from surplus products by the cooperative plants in Miami and Tampa, but Florida cannot yet be classed as a dairy products manufacturing state.

There are 178 ice cream manufacturing plants supplying Florida consumers. 5 of these plants are located over the State-line in Georgia and Alabama, but they are licensed by the State of Florida and are under direct supervision of the Milk Inspection Division.

There are 61 wholesale ice cream manufacturing plants and 117 retail manufacturing plants. One of the retail manufacturers has three manufacturing plants, and one other has two manufacturing plants, the remaining manufacturers operating only one plant each, although seven manufacturers operate two freezers in one plant and one manufacturer operates three freezers in one plant.

Wholesale manufacturers are required to pay the State a yearly inspection license fee of \$50.00 for each manufacturing plant. Their ice cream may be sold through any number of retail outlets, regardless of the ownership of these outlets, without the payment of additional license fees to the Depart-

ment of Agriculture. Retail manufacturers of ice cream are required to pay a yearly fee of \$10.00 for each manufacturing plant and \$10.00 additional for each retail outlet. Retail manufacturers may sell their frozen desserts only through their own stores. The total number of licensed manufacturing plants, both wholesale and retail, is 178, and there are 24 licensed retail stores operated by retail manufacturers, making a total of 202 licensed ice cream plants and stores.

In addition to these established ice cream manufacturing businesses, each year there are a number of transient frozen desserts manufacturers who move from place to place within the State, operating at fairs, circuses and carnivals. These manufacturers are required to pay a license fee of \$10.00 for each location. The State regulations governing the operations of these manufacturers are very strict, and the inspectors must be on hand at these shows to see whether or not an ice cream manufacturer is on the ground and, if he finds a manufacturer there, to see that he complies with requirements. These transient manufacturers are learning that they need not expect the privilege of operating in the State of Florida if they are not adequately equipped.

55 ice cream manufacturers use commercial manufacturing equipment, and 124 use custard machines or counter type freezers, one manufacturer using both types of equipment. There are 135 counter type freezers in operation in the ice cream plants of the State, and there were none here ten years ago. State regulations governing each type of equipment are equally stringent though there is a necessary variation in the requirements due to the lack of space in many of the places of business where counter freezers have been installed.

Lists of the names and mailing addresses of the following groups will be found at the end of this report: Florida dairies of six or more cows, the goat dairies, the dairies operating pasteurization equipment at the farms, city pasteurization plants, cold storage plants, and ice cream manufacturing plants.

At the beginning of the two year period covered by this report most of the dairies and milk and ice cream plants were

in good condition, in fact, the Milk Inspection Division was ready and anxious at that time for the citizens of Florida as well as the tourists to look over the places where their dairy products were produced and handled. However, during the past two years many improvements have taken place, and we give you below a resume of those improvements.

In this connection it must be remembered that there are individuals in all lines of work who are far superior to the others, many who are average, and some who are always struggling to keep employed. These differences in the abilities of men are naturally reflected in the conditions found in the dairies and plants, as they can be no better than the individual or individuals operating them. Therefore, there are excellent, good, fair and poor dairies and plants, and these classifications will always have to be used despite the best efforts of the inspectors who are responsible for the conditions found therein.

We use excellent to apply only to those dairies and plants that are exceptionally well equipped and well conducted, where conditions exceed State requirements. Good applies to those that comply with State requirements and are completely satisfactory. Fair applies to those that need improvement but are acceptable for the time being. Poor applies to those that must make immediate changes to remain in business.

Of the 842 dairies, we would classify them as follows:

Excellent	49
Good	397
Fair	349
Poor	42
Under construction	5

We classify the 176 farm pasteurizers as follows:

Excellent	14
Good	80
Fair	76
Poor	6

The 46 city pasteurizing plants are classified as follows:

Excellent	5
Good	24

Fair	15
Poor	2

Of the 178 ice cream manufacturing plants, we classify them:

Excellent	16
Good	84
Fair	68
Poor	10

Of the 842 dairies, 349 have shown decided improvement during the past two years, and many others that were in satisfactory condition at the beginning of this biennium remain in satisfactory condition at the present time. These improvements are as follows:

- 78 dairies have constructed new barns and milk houses.
- 18 others have built new dairy barns.
- 19 have built new milk houses.
- 3 have built new milk rooms.
- 6 have built new wash rooms.
- 29 have remodeled both dairy barns and milk houses.
- 25 have remodeled dairy barns.
- 36 have remodeled milk houses.
- 4 have remodeled milk rooms.
- 8 have improved surroundings of the dairy buildings.
- 3 have improved their water supply.
- 5 have complete new dairy outfits under construction at the present time.
- 29 have installed new equipment in their milk houses.
- 492 dairies are now using mechanical refrigeration. 212 dairies are using milking machines.
- 101 of the 176 farm pasteurizing units have been installed within the past two years or have been improved during that time. 68 of the 101 are new installations.
- Of the 46 city pasteurizing plants, 35 have been improved or are new plants.
- Of the 178 ice cream manufacturing plants, 75 have been improved during the past two years. 31 new ice cream plants

are now operating that were not in business two years ago; however, about that many have gone out of business during the same period of time.

Once each year one or more of the inspectors from the Milk Inspection Division inspects possible sources of cream and cottage cheese in other States, as Florida dairymen cannot supply the demand for these products during our tourist season, although practically no fluid milk has been shipped into Florida from other States for about five years.

Inspections are made on the basis of requests for inspection by milk products companies that want to ship cream and cottage cheese into Florida and that can assure us that they are fairly confident of meeting Florida requirements. Inspections are made of the processing plants of these companies, the collecting or feeder stations in the large dairy sections which supply the main plants with milk, and a representative group of the dairies in each locality. All must be found in satisfactory sanitary condition before the main plant is approved as a source of sweet cream, sour cream or cottage cheese for the State of Florida.

In the fall of 1938 inspections were made to approve sources of supply of these products for the fiscal year of October 1, 1938, to September 30, 1939. 14 possible sources were inspected in 10 different states, namely, Georgia, Alabama, Tennessee, Kentucky, Indiana, Ohio, Michigan, New York, Virginia and North Carolina.

Permits were refused to 2 companies that had requested inspection due to unsatisfactory conditions, and 12 permits were issued to concerns in 8 states, to the states named above with the exceptions of Kentucky and North Carolina. Though concerns in Ohio and Virginia had permits, no shipments were made during the year from those two states. Cottage cheese only was shipped from Michigan.

The following table shows the total amount of each dairy product shipped into Florida, by states, during the year ending September 30, 1939. The milk shipped in was by special permission, given in case of emergency.

SWEET CREAM—

40% butter fat:	Georgia	42,900 Gals.
	Tennessee	169,419 Gals.
	Alabama	23,071 Gals.
	New York	82,590 Gals.
	Indiana	53,360 Gals.

Total from all states371,340 Gals.

SOUR CREAM—

(Cultured Cream): New York 16,370 Gals.

COTTAGE CHEESE:	Alabama	31,455 Lbs.
	Michigan	145,255 Lbs.

Total from all states176,710 Lbs.

RAW MILK

Georgia 900 Gals.

In the fall of 1939 inspections were made to approve sources of supply of these products for the year of October 1, 1939, to September 30, 1940. 15 possible sources were inspected in the following 9 States: Georgia, Alabama, Mississippi, Tennessee, Indiana, Ohio, Michigan, New York and Virginia.

Permits were refused to 3 of the companies that had requested inspection, and 12 permits were issued to concerns in the 9 states named above. Concerns in all 9 states except Michigan were given permits to ship sweet cream, sour cream and cottage cheese. The Michigan concern was given a permit to ship cottage cheese only. The concerns in Virginia and Ohio made no use of their permits, so there were no importations from those states.

The following table shows the total amount of each dairy product shipped from each State into Florida during the year ending September 30, 1940:

SWEET CREAM—

40% butter fat:	Georgia	4,160 Gals.
	Tennessee	222,980 Gals.
	Alabama	18,140 Gals.
	New York	233,710 Gals.
	Indiana	62,770 Gals.
	Mississippi	2,730 Gals.

Total 40% cream from all states544,490 Gals.

SWEET CREAM—

20% butter fat:	New York	10,150 Gals.
-----------------	----------------	--------------

Total 20% cream from all states 10,150 Gals.

TOTAL 20% and 40% Sweet Cream from
all states554,640 Gals.

SOUR CREAM—

(Cultured Cream):	New York	21,070 Gals.
-------------------	----------------	--------------

COTTAGE CHEESE:	Michigan	191,200 Lbs.
	Alabama	56,680 Lbs.
	New York	1,164 Lbs.

Total from all states249,044 Lbs.

PASTEURIZED MILK:

(By special permission)	Alabama	160 Gals.
-------------------------	---------------	-----------

RAW MILK: None, except amount shipped to one plant in Pensacola from dairies just over State-line in Alabama, inspected and approved by Florida inspectors. This amounted to approximately 84,000 gallons. Pensacola is the normal market for these Alabama dairymen due to their location.

It will be noticed that the importation figures for 1939-40 are much higher than for 1938-39. The 1938-39 figures are very nearly the same as those for the five or six years previous, though slightly higher than one or two of those years when the tourist population was somewhat less than usual.

The extremely high figures of 1939-40, that is, high as compared to previous years, can be attributed to the rapidly increasing resident population of Florida and the very great number of tourists in Florida during the 1939-40 season. The greater number of tourists was caused to a certain degree by the deflection of tourists to American resorts from European resorts, due to unsettled conditions in Europe. People as a rule are becoming fully cognizant of the value of dairy products in their diet, and this tendency to use more dairy products has caused more dairy products to be imported from other States. A great deal more ice cream is being consumed in Florida today than ever before, and much of the fluid sweet cream imported is used in the manufacture of ice cream. The per capita consumption of cottage cheese in Florida is much higher also than in the past.

This increase in importations is not due to lower milk production in Florida. Florida dairymen are producing more fluid milk than ever before, and there is no surplus milk on the Florida market. Not only are the dairymen milking more cows but they are getting more milk per cow due to the improvement in the class of dairy animals in the Florida dairies.

To show the good type of dairy animals used today, the State Department of Agriculture has sponsored at the 1938 and 1939 State Fairs at Tampa an exhibit of representative dairy cows. The Chief Milk Inspector has been in charge of these exhibits. The cows shown are taken from dairies in various parts of the State. The citizens of Florida and the tourists have been pleasantly surprised to see in these exhibits first-class animals.

We believe these exhibits are serving their purpose, that of acquainting the consuming public with the facts about and giving them confidence in our good Florida milk supply. There will be another exhibit of this type at the State Fair at Tampa in February, 1941.

June, 1940, was proclaimed National Dairy Month by President Roosevelt. The dairy industry is one of the greatest and most important industries in the United States and this month was set aside for a concentrated campaign by all interested parties to acquaint the public with the value of the industry to the prosperity of the nation and the value of the use of dairy products in their everyday diet. This campaign was nation-wide in scope, and the Chief Milk Inspector was appointed by the National Dairy Month Committee as Chairman of the campaign in the State of Florida. At his request Governor Fred P. Cone issued a proclamation designating June, 1940, as Dairy Month in Florida. A number of mayors throughout the State also issued like proclamations for their communities.

During the month newspapers carried articles and pertinent advertisements informing the public of the high quality of the milk on the market in Florida and the value to them of the increased consumption of milk and milk products. Several radio talks were given by county agents and city milk inspectors. Articles for this purpose were prepared and furnished to interested parties by the Chief Milk Inspector.

Displays of milk and milk products were made in two of the leading department stores in the City of Jacksonville. Refrigerated show cases and photographs of a dairy and dairy herd were used in these displays. A dairy cow parade and milking contest were held in downtown Jacksonville, and one of the City Commissioners won the milking contest.

In Miami there were hundreds of descriptive vehicle posters distributed to dairymen and plant operators, several hundred June Dairy Month posters were displayed, and a great many show windows were trimmed with dummy milk bottles, displays of dairy products and materials from the three Dairy Month Advertising Kits distributed by the National Dairy Council. Over 100,000 milk bottle collars carrying dairy advertising were purchased and distributed to the Miami dairymen and plant operators.

In St. Petersburg the newspapers cooperated splendidly, and all the milk plants and a number of the dairies advertised their products. Drug stores, restaurants and soda fountains pushed

the sale of milk by suggestions of milk on their menus and by elaborate displays. The fluid milk sales in St. Petersburg increased from 60,642 gallons during the month of June, 1939, to 77,964 gallons during the month of June, 1940, and the sub-chairman in that city said he felt that the campaign put on was partly responsible for the increase.

All in all we feel that Dairy Month was a marked success in Florida in June, 1940.

The Milk Inspection Division of the State Department of Agriculture stands ready to aid the Florida Dairy Industry in every possible way at all times.

TESTING, LABELING AND CERTIFICATION

Chapters 19364 and 19432, Acts 1939.

ANALYSIS OF REVENUE COLLECTED

July 1, 1939 through June 30, 1940

WHOLESALE LICENSES ISSUED	\$10.00 Each	
62 Licenses, Nos. 1 through 62		\$ 620.00
RETAIL LICENSES ISSUED	\$1.00 Each	
1335 Licenses, Nos. 1 through 1335		1,335.00
REVENUE FROM CERTIFICATIONS MADE		1,111.50
Total		\$3,066.50
Less Deductions for Licenses Cancelled or voided:		
Wholesale Licenses, No. 25	\$10.00	
Retail Licenses, Nos. 120, 206, 344, 730, 735, 778, 833, 1258, 1293, 1294	\$10.00	
Total Deductions		\$ 20.00
Net Revenue to Seed enforcing Fund		\$3,046.50

ANALYSIS OF RECEIPTS TO FROZEN DESSERT FUND

Frozen Dessert Licenses Sold

July 1, 1939 to June 30, 1940

WHOLESALE LICENSES:	\$50.00 Each	
Expiring Sept. 30, 1939, 2 Licenses, Nos. 64 and 65		\$ 100.00
Expiring Sept. 30, 1940, 63 Licenses, Nos. 1 thru 63		3,150.00
RETAIL LICENSES:	\$10.00 Each	
Expiring Sept. 30, 1939, 15 Licenses, Nos. 178 thru 192		150.00
Expiring Sept. 30, 1940, 171 Licenses, Nos. 1 thru 171		1,710.00
Total		\$5,110.00
Less Deductions made, Licenses voided:		
Wholesale License expiring Sept. 30, 1940, 1, No. 19	\$50.00	
Retail Licenses expiring Sept. 30, 1940, 1, No. 100	10.00	
Retail Licenses expiring Sept. 30, 1939, 2, Nos. 175 and 176	20.00	
Total Deduction		\$ 80.00
Net Revenue Derived from sale of Licenses		\$5,030.00

PERSONNEL

E. PECK GREENE.....	Chemist	
HAROLD E. HOFFMAN.....	Chemist	
ANTONIO DI BONA.....	Inspector.....	Tampa
J. B. HIERS.....	Inspector.....	Miami
M. F. MCKAY.....	Inspector.....	Tampa
O. K. SHEFFIELD.....	Inspector.....	Ft. Pierce
J. B. TAYLOR.....	Inspector.....	Jacksonville

MANUFACTURERS OF FEEDING STUFFS

The following is list of Feed Manufacturers who have filed their oath of analysis with this department for years July 1, 1938 to June 30, 1940.

Abilene Flour Mills Co., (The)	Abilene, Kansas
Acme Mills, (The)	Oklahoma City, Okla.
Acme Mills	Hopkinsville, Ky.
Adkins, Vint	Sulphur Springs, Fla.
Adler Export Co.	New Orleans, La.
Alabama Calcium Products Co.	Gantt's Quarry, Ala.
Alachua Grain Co.	Alachua, Fla.
Albers Brother Milling Co.	Seattle, Wash.
Alco Feed Mills	Atlanta, Ga.
Alfocorn Milling Co.	East St. Louis, Ill.
Allen, E. T., Co.	Atlanta, Ga.
Allen, R. M. & Sons.	Pinetta, Fla.
Allied Mills, Inc.	Chicago, Ill.
Allied Mills, Inc.	Peoria, Ill.
Amco Feed Store	DeLand, Fla.
American Brewing Co.	Miami, Fla.
American Butter Co.	Kansas City, Mo.
American Rice Milling Co.	Crowley, La.
Americus Oil Co.	Americus, Ga.
Ammons, Phil A., Co.	Tampa, Fla.
Ammons, Phil A., Co.	Ashville, N. C.
Anderson, G. O.	Sopchoppy, Fla.
Anheuser-Busch, Inc.	St. Louis, Mo.
Antelope Valley Alfalfa Mfg. Co.	Lancaster, Calif.
Applegate Grain Company	Pensacola, Fla.
Archer-Daniels-Midland Co.	Minneapolis, Minn.
Arlington Oil Mills	Arlington, Ga.
Armour & Co.	Chicago, Ill.
Ashcraft-Wilkinson Co.	Atlanta, Ga.
Atlanta Milling Co.	Atlanta, Ga.
Atlantic Co.	Orlando, Fla.
Atmore Milling & Elevator Co.	Atmore, Ala.
Attala Co.	Kosciusko, Miss.
Aubrey & Co.	Louisville, Ky.
Aucilla Milling Co.	Aucilla, Fla.
Baker, H. J. & Bro.	New York, N. Y.
Balfour, Guthrie & Co., Ltd.	New York, N. Y.
Ballard & Ballard Co., Inc.	Louisville, Ky.
Ballard & Ballard Co., Inc.	Tampa, Fla.
Baltimore Feed & Grain Co.	Baltimore, Md.

Bauman Feed & Supply Co.	DeLand, Fla.
Bay Milling Co.	Panama City, Fla.
Beaumont Rice Mills	Beaumont, Tex.
Bell Milling Co.	Marianna, Fla.
Benton, J. M.	Sanford, Fla.
Bernd, G. Co.	Macon, Ga.
Bethea, C. D.	Gainesville, Fla.
Betta Feed Mills (The)	Jackson, Miss.
Bewley Mills	Fort Worth, Tex.
Big Four Mills, Ltd.	Covington, Ky.
Birdsey Flour Mills	Macon, Ga.
Bisbee Linseed Co.	Philadelphia, Pa.
Blair, Joe	Miami, Fla.
Blatchford Calf Meal Co.	Waukegan, Ill.
Bob White Flour Mills	Fort Worth, Tex.
Boehling, F. H. Co.	Richmond, Va.
Borden Co., (The)	New York, N. Y.
Bowersock Mills & Power Co.	Lawrence, Kas.
Bradley & Baker	Jacksonville, Fla.
Brandon Mill & Elevator Co.	Marianna, Fla.
Brandon Mills	Williston, Fla.
Brookhaven Creamery Co., Inc.	Brookhaven, Miss.
Broward Grain & Supply Co.	Ft. Lauderdale, Fla.
Bruce Milling Co.	Valdosta, Ga.
Brunson Milling Co.	Tallassee, Ala.
Bryant's	Bartow, Fla.
Buckeye Cotton Oil Co., (The)	Cincinnati, O.
Buie, G. A.	Lake City, Fla.
Burrus Feed Mills	Dallas, Tex.
Burrus Mill & Elevator Co.	Fort Worth, Tex.
Camden Grain Co.	Camden, N. J.
Camilla Cotton Oil Co.	Camilla, Ga.
Capital Grain & Feed Co.	Montgomery, Ala.
Cape County Milling Co.	Jackson, Mo.
Carter, Ferd M.	Tampa, Fla.
Carey Salt Co., (The)	Hutchinson, Kas.
Cash Grain Co.	Jacksonville, Fla.
Cellon, L. S.	Alachua, Fla.
Central Cotton Oil Co.	Macon, Ga.
Central Soya Co., Inc.	Fort Wayne, Ind.
Chancy, W. S.	Hartsford, Ala.
Cartledge Fertilizer Co.	Cottondale, Fla.
Chatham County Milling Co.	Savannah, Ga.
Checkerboard Feed Store	Miami, Fla.
Checkerboard Feed Store	Palatka, Fla.

Checkerboard Elevator Co.	St. Louis, Mo.
Chickasha Milling Co.	Chickasha, Okla.
Citro-Dry Pulp	Sanford, Fla.
Citrus Pulp, Inc.	Tampa, Fla.
City Mills Co.	Columbus, Ga.
Claxton Milling Co.	Claxton, Ga.
Cleveland Milling Company	Cleveland, Tenn.
Clinton Co.	Clinton, Iowa
Clofine, Herbert K.	Philadelphia, Pa.
Coastal Plains Milling Co., Inc.	Moultrie, Ga.
Collis Products Co.	St. Paul, Minn.
Cole, H. C. Milling Co.	Chester, Ill.
Collodial Products of America, Inc.	Orlando, Fla.
Colnon, A. J.	Pensacola, Fla.
Colonial Milling Co.	Nashville, Tenn.
Comet Rice Mills	Beaumont, Texas
Commander Larabee Milling Co.	Minneapolis, Minn.
Conkey, G. E. Co. (The)	Cleveland, Ohio
Conner Milling Co.	Enterprise, Ala.
Consolidated Chemicals Industries, Inc.	New York, N. Y.
Consolidated Chemical Industries, Inc.	Woburn, Mass.
Consolidated Flour Mills Co., Inc.	Wichita, Kans.
Consolidated Products Co.	Danville, Ill.
Cook, L. P. & Son	Memphis, Tenn.
Cooper Milling Co.	Atlanta, Ga.
Cordele Mill & Elevator Co.	Cordele, Ga.
Corn Products Refining Co.	New York, N. Y.
Cosby-Hodges Milling Co.	Birmingham, Ala.
Coulson, A. R.	DeFuniak Springs, Fla.
Crews Flour & Feed Co.	West Palm Beach, Fla.
Cudahy Packing Co. (The)	Chicago, Ill.
Cumberland & Liberty Mills Co.	Jacksonville, Fla.
Dade County Grain & Dairy Feed Co.	Miami, Fla.
Davis & Andrews Mills	Memphis, Tenn.
Davis Milling Co.	Norfolk, Va.
Dawson Cotton Oil Co.	Dawson, Ga.
Decatur Milling Co., Inc.	Decatur, Ill.
DeLand Feed & Supply Co.	DeLand, Fla.
Delta Alfalfa Products, Inc.	Greenville, Miss.
Denver Alfalfa Milling & Products Co.	Lamar, Colo.

Fertilizer Inspection Division

July 1, 1938 to June 30, 1940

PERSONNEL

FERTILIZER CHEMISTS

Gordon Hart	R. M. Smith	W. Y. Gary
J. K. Lawton	E. B. Loyless, Jr.	Dan Long

FERTILIZER INSPECTORS AND CLERKS

W. A. O'BRYAN.....	Statistician	
W. S. McLIN, JR.....	Clerk	
J. L. CARROLL.....	Inspector.....	Marianna
J. W. DAVIS.....	Inspector.....	Ocala
A. G. COLCORD.....	Inspector.....	Ft. Myers
R. F. MILLIKIN.....	Inspector.....	Palatka
R. R. ROPER.....	Inspector.....	Winter Garden
RUPERT SMITH.....	Inspector.....	Arcadia

FERTILIZER MANUFACTURERS

List of Fertilizer Manufacturers who have filed their oaths of analyses with this Department for years 1938-1940.

Agricultural Iron Co.	Ocala, Fla.
Agricultural Limestone Co.	Marianna, Fla.
American Limestone Co.	Birmingham, Ala.
Alabama Basic Slag	Birmingham, Ala.
Alabama Calcium Products Co.	Gantt's Quarry, Ala.
(Alabama Marble Co)	
Alkire, Ted	Lubbock, Tex.
American Agricultural Chemical Co.	Pensacola, Fla.
American Agricultural Chemical Co.	Pierce, Fla.
American Cyanamid Co.	Brewster, Fla.
American Cyanamid Co.	New York, N. Y.
Agricultural Limestone Co.	Knoxville, Tenn.
American Liquid Fertilizer Co.	Marietta, O.
Amsterdam Superphosphate & United Chemical Works	Utrecht, Holland
Armour Fertilizer Works	Jacksonville, Fla.
Barrett Co. (The)	New York, N. Y.
Bellah, G. W.	Hernando, Fla.
Blue Belt Fertilizer Co.	Savannah, Ga.
Bradly Drug Store	Palmetto, Fla.
Bradly Estates, Inc.	Floral City, Fla.
Calcium Phosphate Co.	Bartow, Fla.
Carolina Lime Co.	Charleston, S. C.
Carolina Phosphate Products Co.	Charleston, S. C.
Cartledge Fertilizer Co.	Cottondale, Fla.
Casselberry Fertilizer Co.	Winter Park, Fla.
Cates, J. J., Co., Inc.	Sanford, Fla.
Chase & Co.	Sanford, Fla.
Chatelier Laboratories	St. Petersburg, Fla.
Chilean Nitrate Sales Corporation	New York, N. Y.
Citrus Culture Corporation	Mount Dora, Fla.
Citrus Seed Oil Corporation	Winter Haven, Fla.
Climax Fertilizer Co.	West Palm Beach, Fla.
Colloidal Institute	Lakeland, Fla.
Colloidal Phosphate Sales Co.	Dunellon, Fla.
Connell & Shultz	Inverness, Fla.
Consolidated Chemical Industries, Inc.	Houston, Tex.
Cooperative Hydroponics, Inc.	Ft. Lauderdale, Fla.
Coronet Phosphate Co.	Plant City, Fla.
Cummer Lime & Manufacturing Co.	Ocala, Fla.
Crosland, T. C.	Punta Gorda, Fla.
Davison Chemical Corporation	Cordele, Ga.

(Read Phosphate Div.)

Davison Chemical Corporation	Savannah, Ga.
(G. Ober & Sons Div.)

Orange County Fertilizer Co.	Orlando, Fla.
Organo Corporation of Florida	Orlando, Fla.
Painter, E. O. Fertilizer Co.	Jacksonville, Fla.
Pan-American Guano Co. of Florida	Miami, Fla.
Parrish Fertilizer Manufacturing Co.	DeLand, Fla.
Pearce Fertilizer & Supply Co.	Fort Myers, Fla.
Pearson, John F.	Sanford, Fla.
Pelham Phosphate Co.	Pelham, Ga.
Peninsular Fertilizer Works	Tampa, Fla.
Phillips Fertilizer, Inc., Dr. P.	Orlando, Fla.
Phosphate Mining Co. (The)	Nichols, Fla.
Pinellas Growers Association	Clearwater, Fla.
Planters Exchange, Inc.	Havana, Fla.

Plant Food Co.	Charlotte, N. C.
Plymouth Fertilizer Works	Plymouth, Fla.
Polk County Fertilizer Co.	Haines City, Fla.
Porter Co., M. R.	Ocala, Fla.
Potash Company of America	Baltimore, Md.
Potash Company of America	Atlanta, Ga.
Potash Export My., Inc., N. V.	New York, N. Y.
Producers Rock & Lime Co.	Palmetto, Fla.
Producers Supply, Inc.	Palmetto, Fla.
Pulverized Manure Co. (The)	Chicago, Ill.
Ra-Pid-Gro Corporation	Danville, N. Y.
Reliance Fertilizer Co.	Savannah, Ga.
Republic Steel Corp.	Alabama City, Ala.
Robertson Chemical Corp.	Norfolk, Va.
Royster Guano Co., F. S.	Norfolk, Va.
Rood Citrus Products Co.	Bradenton, Fla.
Rutland, A. K.	Lakeland, Fla.
Sanders, B. N.	Lakeland, Fla.
Scientific Plant Food Co.	Miami, Fla.
Security Feed & Seed Co.	Jacksonville, Fla.
Security Feed & Seed Co.	Tampa, Fla.
Seminole Fertilizer Co.	Miami, Fla.
Sewerage Commission of Milwaukee	Milwaukee, Wis.
Shore Fertilizer Co.	Plant City, Fla.
Sinclair Guano Co.	Miami, Fla.
Smith-Douglas Co., Inc.	Norfolk, Va.
Soil Builders, Inc.	Dunnellon, Fla.
Soilade Products, Inc.	Miami, Fla.
South Atlantic Reduction Corp.	Orlando, Fla.
South Lake Fertilizer Works	Oakland, Fla.
Southern Cotton Oil Co.	Pensacola, Fla.
Southern Cotton Oil Co.	Valdosta, Ga.
Southern Fertilizer & Chemical Co.	Savannah, Ga.
Southern Florida Fertilizer Co.	South Miami, Fla.
Southern Hy-Trous Co.	Jacksonville, Fla.
Southern Phosphate Corp.	Bartow, Fla.
Southern Tobacco By-Products Corp.	Greenville, N. C.
Sowega Fertilizer Co.	Adel, Ga.
Spaulding Feed Co.	St. Petersburg, Fla.
Standard Chemical Co.	Troy, Ala.
Standard Fertilizer Co.	Gainesville, Fla.
Standard Wholesale Phosphate & Acid Wks.	Baltimore, Md.
*Stone, Leo K.	Pierson, Fla.
Stuckey Fertilizer Works	Pahokee, Fla.
Sullivan, H. C.	Frostproof, Fla.
Superior Fertilizer Co.	Tampa, Fla.

Superior Phosphate Co.	Dunnellon, Fla.
Swift & Co. Fertilizer Works	Bartow, Fla.
Swift & Co. Fertilizer Works	Atlanta, Ga.
Swift & Co. Fertilizer Works	Albany, Ga.
Swift & Co. Fertilizer Works	New Orleans, La.
Swift & Co. Fertilizer Works	Harvey, La.
Synthetic Nitrogen Products Corp.	New York, N. Y.
Tennessee Coal, Iron & Railroad Co.	Birmingham, Ala.
Tennessee Corporation	Atlanta, Ga.
Tennessee Corporation	Lockwood, Ohio
Thomasville Fertilizer Co.	Thomasville, Ga.
Tilghman, William B. Co.	Salisbury, Md.
Tru-Base Plant Food Co.	St. Petersburg, Fla.
Trueman Fertilizer Co.	Jacksonville, Fla.
Umatilla Fertilizer Works	Umatilla, Fla.
United States Gypsum Co.	Chicago, Ill.
United States Gypsum Co.	Jacksonville, Fla.

PERSONNEL

F. W. FARNSWORTH Chemist
MISS ZOE D. MANNING Clerk

MANUFACTURERS OF INSECTICIDE AND FUNGICIDE

The following is a list of manufacturers who have been licensed by the department to manufacture and sell insecticides and fungicides for the years July 1, 1938 to June 30, 1940:

Agricultural Insecticide Co., Inc. Belle Glade, Fla.
American Agricultural Chemical Co. (The) .. New York, N. Y.
American Cyanamid & Chemical Corp. New York, N. Y.
Antrol Laboratories, Inc. Los Angeles, Calif.
Baldwin Laboratories, Inc. Saegertown, Pa.
Bayer-Semesan Co., Inc. Wilmington, Del.
Boyle (The) A. S. Co. Jersey City, N. J.
Brooklyne Chemical Works, Inc. Baltimore, Md.
Broward Grain & Supply Co. Ft. Lauderdale, Fla.
California Spray-Chemical Corp. Richmond, Calif.
Chase & Co. Sanford, Fla.
Chipman Chemical Co., Inc. Bound Brook, N. J.
Cold Smoke Products Co. Orlando, Fla.
Dixie Insecticide Co., Inc. Miami, Fla.
Dow Chemical Co., (The) Midland, Mich.
DuPont de Nemours, E. I. & Co., Inc. Wilmington, Del.
Florence Citrus Growers Ass'n. Florence Villa, Fla.
Florida Agriculture Supply Co. Orlando, Fla.
Florida Insecticide Co., Inc. Apopka, Fla.
General Chemical Co. New York, N. Y.
Good, James, Inc. Philadelphia, Pa.
Growers Fertilizer Cooperative Lake Alfred, Fla.
Gulf Oil Corporation Atlanta, Ga.
Haines City Fertilizer Works Haines City, Fla.
Hammond Paint & Chemical Co., Inc. Beacon, N. Y.
Hector Supply Co. Miami, Fla.

Irvington Smelting & Refining Works	Irvington, N. J.
Johnson Chemical Mfg. Co.	Smithville, N. C.
Kay Laboratories, Division of Kay-	
Fries Chemicals, Inc.	West Haverstraw, N. Y.
Kilgore Seed Co.	Plant City, Fla.
McCormick, (The), Sales Co.	Baltimore, Md.
McLaughlin Gormley King Co.	Minneapolis, Minn.
Merck & Co., Inc.	Rahway, N. J.
Midway Chemical Co.	Jersey City, N. J.
Naco Fertilizer Co.	Jacksonville, Fla.
Niagara Sprayer & Chemical Co., Inc.	Middleport, N. Y.
Orange Manufacturing Co.	Orlando, Fla.
Pfizer, Charles & Co., Inc.	New York, N. Y.
Phillips, Dr. P. Fertilizers, Inc.	Dr. Phillips, Fla.
Phelps Dodge Refining Corp.	New York, N. Y.
Pittsburgh Plate Glass Co.	Milwaukee, Wis.
Planters Exchange, Inc. (The)	Havana, Fla.
Plymouth Fertilizer Works	Plymouth, Fla.
Reichhold Chemicals, Inc.	Brooklyn, N. Y.
Rohm-Hast Chemicals, Inc.	Philadelphia, Pa.
Rose Mfg. Co.	Philadelphia, Pa.
Schnarr, J. & Co.	Orlando, Fla.
Seminole Fertilizer Co.	Miami, Fla.
Sherwin Williams Co.	Bound Brook, N. J.
Soilade Products, Inc.	Miami, Fla.
Solvay Sales Corp.	Syracuse, N. Y.
Southern Acid & Sulphur Co., Inc.	St. Louis, Mo.
Tennessee Copper Co.	Copperhill, Tenn.
Tobacco By-Products & Chemical Corp.,	
Inc.	Louisville, Ky.
Tobacco By-Products & Chemical Corp.	
Inc.	Richmond, Va.
Tropical Insecticide Co.	Auburndale, Fla.
U. S. Phosphoric Products Corp.	Tampa, Fla.
Venro Chemical Corp.	Arlington, Mass.
Waverly Fertilizer Works	Waverly, Fla.
Wedgeworth, H. H.	Belle Glade, Fla.
Wilson (The) A. L. Co.	Quincy, Fla.
Wilson, Andrew, Inc.	Springfield, N. J.
Woburn, Inc.	Brooksville, Fla.
Woolfolk, J. W., Co., (The)	Fort Valley, Ga.

Gasoline Inspection Division

July 1, 1938 to June 30, 1940

PERSONNEL

CENTRAL LABORATORY

NALLS BARRYMAN	Chief Oil Analyst
C. PERRY COLEMAN	Assistant Oil Analyst
SYDNEY D. ANDREWS	Assistant Oil Analyst
WILLARD BROOKS	Assistant Oil Analyst
DONALD FRISON	Assistant Oil Analyst

FIELD LABORATORIES

CLARK P. DOUGLAS	Assistant Oil Analyst, Field Lab. No. 1
ALFRED ROE	Clerk, Field Lab. No. 1
JOHN J. BOND	Assistant Oil Analyst, Field Lab. No. 2
JULIAN TURNER	Clerk, Field Lab. No. 2
JACK D. MCALILEY	Assistant Oil Analyst, Field Lab. No. 3
E. D. ROU, JR.	Clerk, Field Lab. No. 3
JAS. S. MCCAWLEY	Assistant Oil Analyst, Field Lab. No. 4
RALPH HARMON	Clerk, Field Lab. No. 4

INSPECTORS

B. W. BRINSON	Madison
W. E. BUHRMAN	Sanford
P. M. NASWORTHY	Tampa
G. F. FLETCHER	St. Petersburg
W. A. HAILE	Gainesville
ROY HUTCHINSON	Tallahassee
WM. MCCARREL	Jacksonville
ROY NETTLES	Tampa
C. A. PARKER	Lakeland
W. C. GIBSON	Miami
L. S. WARREN	Pompano
GEORGE WILSON	Jacksonville
J. B. WILKERSON	Pensacola
HUGH IGOU	Eustis
TOM NEWNHAM	Winter Haven
E. B. GREEN	Ocala

REGISTERED OIL COMPANIES DOING BUSINESS IN
STATE OF FLORIDA

Years July 1, 1938 to June 30, 1940

Atlantic Refining Co.	Jacksonville, Fla.
Atlantic Refining Co.	Atlanta, Ga.
American Oil Co.	Jacksonville, Fla.
Arkansas Fuel Oil Co.	Shreveport, La.
Capital City Oil Corp.	Tallahassee, Fla.
Chalmette Petroleum Corp.	New Orleans, La.
Citizens Oil Co.	St. Marks, Fla.
Coastal Petroleum Corp.	Mobile, Ala.
Coastal Petroleum Corp.	Tampa, Fla.
Columbia Oil Co.	Orlando, Fla.
Direct Distributors, Inc.	Tampa, Fla.
Florida Peoples Oil Co.	Atlanta, Ga.
Galena Oil Corporation	Jacksonville, Fla.
Gardner Oil Co.	Pensacola, Fla.
Gulf Oil Corporation	Atlanta, Ga.
Hempstead Oil & Storage Co., Inc.	Mobile, Ala.
Imperial Florida Oil Co.	Tampa, Fla.
Independent Oil Company	Dothan, Ala.
Louisiana Oil Corp.	Shreveport, La.
National Oil Co.	Richmond, Va.
Orange State Oil Co.	Miami, Fla.
Pan-American Petroleum Corp.	New Orleans, La.
Pure Oil Co.	Jacksonville, Fla.
Republic Oil Co.	Petersburg, Va.
Sanford Service Co.	DeFuniak Springs, Fla.
Seaboard Oil Co., (The)	Jacksonville, Fla.
Shaw Brothers Oil Co.	Miami, Fla.
Shell Oil Co.	Atlanta, Ga.
Sherrill Oil Co.	Pensacola, Fla.
Sinclair Refining Co.	Atlanta, Ga.
Sinclair Refining Co.	Jacksonville, Fla.
South Georgia Grocery Co.	Quitman, Ga.
Southern Oil Stores, Inc.	Jacksonville, Fla.
Spur Distributing Co., Inc.	Nashville, Tenn.
Standard Oil Co.	Jacksonville, Fla.
Standard Oil Co.	Birmingham, Ala.
Standard Oil Co.	Tampa, Fla.
Sun Oil Co.	Philadelphia, Pa.
Sun Oil Co.	Jacksonville, Fla.
Sunny State Oil Co.	Panama City, Fla.
Texas, Co., (The)	Atlanta, Ga.

Tabulation of:

GASOLINE AND KEROSENE SALES
BY MONTH AND COUNTY

CONSUMPTION OF GASOLINE, KEROSENE
AND SIGNAL OIL BY COUNTIES

MONTHLY SALES OF GASOLINE AND KEROSENE
SOLD TO U. S. GOVERNMENT
(INSPECTION FREE)

July 1, 1938 to June 30, 1939

TABLE OF GASOLINE AND KEROSENE SALES—ARRANGED BY MONTHS AND COMPANIES

(Gallons shown is sales for month prior to month shown, as sales reports are registered by Department month following actual sales)
